

OTC PUBLISHING HOUSE

BTEC Level 3 Business Assignment Writing Toolkit

Independent Bilingual Study Support Companion

BTEC Level 3 Business assignment writing bilingual output system

Expanded review draft v0.4.1 · 26 May 2026

Publication Record

Title	BTEC Level 3 Business Assignment Writing Toolkit
Series	Independent Bilingual Study Support Companion
Publisher imprint	Overseas Publishing House / OTC Study Hub
Internal ID	OTC-BTEC-L3-BUS-AWT-001
ISBN status	TBC before release
Publication status	expanded manuscript draft under editorial review

This draft is prepared for editorial review, proofing and publication-pack development. It is not an official Pearson / BTEC publication.

PUBLICATION BOUNDARY

This manuscript is an independent OTC bilingual output-system resource for assignment-based learners. Official Pearson / BTEC publications, awarding-body documents, assignment briefs, mark schemes, assessment decisions and centre guidance remain the controlling sources. The manuscript trains brief reading, evidence planning, academic phrasing and self-checking within academic-integrity boundaries.

本書稿是 OTC / 海外書局面向 assignment-based learners 的獨立雙語輸出系統資源。Pearson / BTEC 官方出版物、awarding-body 文件、assignment brief、mark scheme、assessment decision 與 centre guidance 仍是最終依據。本書稿訓練 brief reading、evidence planning、academic phrasing 與 self-checking，並把 academic integrity 邊界放進寫作流程。

Preface

Many Chinese learners studying BTEC Level 3 Business have subject ideas, classroom understanding and business examples, but those ideas often do not yet travel well into English assignment writing.

In class, a learner may understand what a business aims to do, why customers matter, why a marketing method can help, or why finance affects decision making. But when the assignment brief asks the learner to explain, analyse, recommend or evaluate, the answer often becomes unclear. It may become too descriptive, too translated, too general, unsupported by evidence, or too dependent on AI-generated wording.

This toolkit is designed for that gap.

It trains the learner to move through a disciplined bilingual output process:

1. Read the assignment brief carefully.
2. Identify the command word and task object.
3. Understand what kind of evidence is needed.
4. Plan the paragraph before writing it.
5. Use bilingual concept support without translating word by word.
6. Check whether the answer is descriptive, applied or evaluative.
7. Keep academic integrity visible from the beginning.

很多中國學生學 BTEC Level 3 Business 時，真正卡住的地方，是如何把已經懂的內容轉成英文 assignment。學生可能知道「企業需要顧客」「推廣可以增加銷售」「成本會影響決策」，但一到正式作業，就容易寫成中文作文翻譯版，或者寫成沒有證據的泛泛而談。

本工具箱的目的，是幫學生建立一套可重複使用的 assignment writing process：理解 brief、拆解 criteria、規劃 evidence、組織 paragraph，並避免 academic misconduct。

How to use this toolkit

This toolkit is designed to be used before, during and after assignment writing. It should not be read only from beginning to end like a normal textbook. A learner can use it as a working companion whenever a BTEC Business assignment becomes unclear.

If you have just received an assignment brief

Start with Chapter 2. Do not begin writing immediately. Use the brief-reading formula to identify:

- the command word;
- the task object;
- the business context;
- the evidence demand;
- the required output format;
- any centre-specific instructions.

Then return to Chapter 1 if you need to understand why assignment-based learning is different from exam revision.

If you understand the topic but do not know how deep to write

Use Chapter 3. This chapter does not promise grades and does not replace centre assessment criteria. It helps you understand the general movement from completion to application to judgement. This is useful when your writing feels too basic, too descriptive or too unsupported.

If you have ideas but no evidence

Use Chapter 4 before writing the paragraph. Do not write a paragraph first and then search for evidence afterwards. Use the evidence planning matrix to decide what kind of proof your point needs.

If your paragraph sounds like translated Chinese

Use Chapter 5. The paragraph frames and bilingual conversion tables help you move from Chinese business thinking to English academic function. The frames should be adapted, not copied. They are paragraph scaffolds, not model answers.

If you use AI, tutoring or teacher feedback

Use Chapter 6. Academic integrity must be managed from the beginning, not repaired at the end. If you cannot explain a paragraph, source or recommendation in your own words, you do not yet have enough ownership of the work.

Before submission

Use Chapter 7. Check task alignment, evidence, application, evaluation, authorship and final file control. Do not spend the final review only replacing simple words with difficult words.

本書適合在 assignment 的不同階段反覆使用：

- 剛拿到 brief：先看 Chapter 2。
- 不知道 Pass / Merit / Distinction 寫作差異：看 Chapter 3。
- 有想法但沒有證據：看 Chapter 4。
- 段落像中文直譯：看 Chapter 5。
- 使用 AI、補習或老師 feedback：看 Chapter 6。
- 提交前最後檢查：看 Chapter 7。

最重要的原則是：先理解任務，再規劃證據，再寫段落，最後檢查合規。不要一拿到題目就直接寫。

BTEC Business topic map

BTEC Level 3 Business assignments may cover a wide range of applied business topics. This toolkit does not reproduce official unit materials or assessment briefs. Instead, it gives writing support that can be adapted to common business areas.

Business area	Common assignment challenge	Writing support in this toolkit	學生端理解
Marketing	Learners describe promotion but do not apply it to a target market.	Brief reading, evidence planning, paragraph frames, evaluation conditions.	不要只說「多宣傳」。要說 target customer、channel fit、cost 和效果衡量。
Finance	Learners mention profit or cash flow but do not explain business implications.	Evidence audit, cautious language, recommendation frames.	不要把 finance 寫成「有錢好、沒錢不好」。要分析 cost、cash flow、risk、repayment。
Human resources	Learners recommend training without diagnosing the staffing problem.	Task object analysis, evidence matching, application audit.	不要一遇到員工問題就寫 training。先看問題是 skill、motivation、process 還是 management。
Enterprise and entrepreneurship	Learners list risks but do not connect them to decision making.	Evidence gaps, evaluation questions, scenario-based judgement.	風險要寫 impact 和 response。不要只列風險名稱。
Customer service	Learners write that customers are important but do not show service outcomes.	Application audit, paragraph functions, final judgement.	要把 customer experience 和 repeat purchase、reputation、complaints、sales 連起來。
Operations	Learners describe processes but do not analyse efficiency, quality or capacity.	Evidence planning and business context checks.	Operations 不是流水帳，要看 time、cost、quality、capacity 和 bottleneck。
International business	Learners make broad claims about global markets.	Cautious language, source hierarchy, limitation writing.	不要寫「全球化很好」。要看 market entry、culture、currency、legal and logistics risks。
Business environment	Learners list PESTLE factors without linking them to the organisation.	Task alignment and evidence matrix.	PESTLE 不是背表格，要說哪個 factor 對這家企業最重要。

The same writing discipline applies across these topics:

1. Identify the task.
2. Select the relevant concept.
3. Apply it to the business context.
4. Use honest evidence.
5. Explain the business implication.
6. Evaluate suitability and limitations.

不同 business topic 看起來不同，但寫作底層邏輯相同。學生需要掌握一套可重複使用的流程：

題目要求是什麼？概念是什麼？企業情境是什麼？證據在哪裡？這對 business decision 有什麼影響？有什麼限制？

只要這套流程穩定，學生寫 marketing、finance、HR、enterprise、customer service 或 operations，都會更有方向。

Contents

Section	Purpose	Proof page
Front matter	Title, publication boundary, positioning and reader guidance.	1

Section	Purpose	Proof page
Part I. Core Assignment Writing Toolkit	Chapters 1-7: brief reading, grade-awareness, evidence, paragraph writing, integrity and final checks.	7
Chapter 1	Explains what assignment-based Business learning is really asking for.	8
Chapter 2	Trains learners to read assignment briefs before writing.	14
Chapter 3	Builds Pass / Merit / Distinction awareness without making grade promises.	19
Chapter 4	Helps learners plan honest and relevant evidence.	27
Chapter 5	Provides paragraph frames and bilingual academic-writing scaffolds.	33
Chapter 6	Sets academic-integrity, AI-use and authorship boundaries.	41
Chapter 7	Provides final submission checks and readiness protocols.	47
Part II. Subject Stickers	Compact subject maps for common BTEC Business topic areas.	52
Part III. Academic Writing Phrasebook	Master phrasebank plus topic-specific application riders.	58
Part IV. Avoidance Booklet	Category-specific weak lines and stronger academic alternatives.	62
Part V. Mini Templates	Practice scaffolds for brief reading, evidence, evaluation and feedback use.	70
Part VI. Tiny Review Booklets	Twenty compact review cards for final paragraph audit.	110
Appendices A-E	Phrase bank, breakdown sheet, evidence log, submission checklist and bilingual glossary.	117

本書按 assignment workflow 排列：先讀題，再理解深度，再規劃證據，再寫段落，再處理 AI / integrity，最後提交檢查。後半部是可抽取使用的 workbook-style reference section；Appendices 放在全書最後，方便查閱。

Part I. Core Assignment Writing Toolkit

This part contains the core learning sequence. It should be read before the workbook-style reference tools in Parts II-VI.

核心學習順序先建立 assignment writing 的工作方法，再使用後半部的 phrasebook、avoidance cards 和 templates。

Chapter 1. What BTEC Business Assignments Are Really Asking You To Do

1.1 Assignment-based learning is not the same as exam revision

In an exam-heavy course, a learner often prepares by memorising definitions, practising timed questions and learning how marks are allocated. In an assignment-based course, the learner still needs subject knowledge, but the main challenge is different.

An assignment asks the learner to produce a piece of work over time. This work normally requires planning, research, evidence selection, written explanation and some form of judgement. The learner is not only showing that they remember a concept. They are showing that they can use a concept in a business context.

For example, knowing the definition of a target market is useful, but it is not enough. A business assignment may ask the learner to explain who the target market is for a campaign, why that group matters, what evidence supports the choice, and what limitations may affect the campaign.

This is why many learners who are strong at memorising definitions still feel uncertain when they begin a BTEC assignment. They may know the topic, but they have not yet learned how to turn the topic into a structured piece of assessed writing. The assignment is not asking for a memory dump. It is asking for controlled academic output.

In a Business assignment, the learner usually needs to demonstrate three abilities at the same time:

1. **Business understanding:** knowing the concept and using it accurately.
2. **Business application:** applying the concept to a selected organisation, case or scenario.
3. **Written judgement:** explaining, analysing or evaluating in a way that matches the command word.

If one of these layers is missing, the answer becomes weak. A paragraph with business terms but no organisation context is too abstract. A paragraph with a business story but no concept is too informal. A paragraph with opinions but no evidence is too unsupported.

Assignment-based learning 的核心在於把知識點放入一個具體 business context。學生不能只寫「target market means a group of customers」，而要回答：

- 這家企業的 target market 是誰？
- 為什麼是這一類顧客？
- 有什麼證據支持？
- 這個判斷有什麼限制？

如果答案只停留在定義層面，就很容易變成 descriptive answer。

對中國學生來說，這裡最容易出現一個錯覺：以為自己已經懂了概念，就等於已經能完成 assignment。其實中間還差一層「英文學術輸出」。學生需要把中文理解轉換成英文論證，而不是把中文想法逐句翻譯。

Mini diagnostic

Before starting an assignment, ask yourself:

- Can I explain the business concept without copying a definition?
- Can I apply the concept to one named business or scenario?
- Can I identify what evidence would make my point stronger?
- Can I explain limitations without simply writing “there are advantages and disadvantages”?

If the answer to any of these questions is no, the learner is not ready to write the final paragraph yet. The learner is ready to plan.

中文自測

正式寫正文之前，先問自己四個問題：

- 我能不能不用背誦定義，也說清這個商科概念？
- 我能不能把概念放到一個具體企業或案例裡？
- 我知道這一段需要什麼證據嗎？
- 我能不能寫出限制，而不是只寫「有優點也有缺點」？

如果其中任何一題答不上來，先不要急著寫成文。這時候要做的是 planning，不是 final writing。

1.2 The hidden task: move from knowledge to output

Most weak assignment answers fail somewhere between knowledge and output.

The learner may have knowledge:

- marketing mix
- stakeholders
- recruitment
- revenue and cost
- business aims
- customer segmentation

But the final written output may not show that knowledge clearly. The answer may include correct terms but no argument. It may include examples but no explanation. It may include long paragraphs but no structure. It may mention evidence but not use it.

The purpose of this toolkit is to help the learner build the missing bridge.

Learning step	What the learner does	中文理解
Concept	Understand the business idea	先懂概念，例如 promotion、target market、cash flow
Context	Apply it to the business case	把概念放回題目中的企業，而不是泛泛而談
Evidence	Choose support for the point	找證據支持，不要空口判斷
Writing	Turn it into a paragraph	用英文段落表達，而不是中文直譯
Evaluation	Judge suitability and limits	判斷方案是否適合、限制在哪裡

This sequence matters. Learners often want to jump from concept directly to writing. That shortcut creates vague paragraphs. A stronger answer usually passes through all five steps, even if the final paragraph looks short.

For example, if the topic is promotion, the learner should not immediately write “promotion is important.” The learner should first ask:

- Which business is being discussed?
- What customer group is relevant?
- What promotional method is realistic?
- What evidence supports that method?
- What limitation affects the recommendation?

Only after these questions have been answered should the learner begin the paragraph.

Common mistake

Learners often write: “The business should use social media because social media is popular.”

This is too general. It does not show why social media is suitable for this business, this customer group or this problem.

Better thinking

The learner should ask:

- Which customer group uses this channel?
- What problem does the business need to solve?
- What evidence suggests the method may work?
- What makes the method limited?

「社交媒體很流行」不是商科分析。真正的商科分析要說清楚：對這家企業、這類顧客、這個問題而言，社交媒體為什麼可能合適。否則答案只是常識，不是 assignment evidence。

1.3 The three layers of a business assignment answer

A useful way to understand BTEC Business writing is to imagine three layers.

Layer	Weak answer	Stronger answer
Concept layer	The learner defines a term only.	The learner explains the concept accurately and selects the part relevant to the task.
Context layer	The learner writes about business in general.	The learner applies the point to a named organisation, scenario or customer group.

Layer	Weak answer	Stronger answer
Judgement layer	The learner gives an opinion.	The learner makes a reasoned judgement using evidence, limits and conditions.

The concept layer is necessary, but it is not enough. Business assignments rarely reward learners for definitions alone. A definition may be useful at the beginning of a paragraph, but the paragraph must quickly move into application.

The context layer is where many answers begin to improve. Instead of writing “social media helps businesses,” the learner writes “social media may help Harbour Bean Cafe reach local student customers because...” This is a different quality of writing. The business case is now controlling the paragraph.

The judgement layer is where the answer becomes more mature. The learner stops treating a method as automatically good and begins to ask whether it is suitable, realistic and measurable.

一篇商科 assignment answer 通常有三層：

1. 概念層：我是否理解這個商科概念？
2. 情境層：我是否把概念放回題目中的企業？
3. 判斷層：我是否能根據證據和限制作出判斷？

很多學生只完成第一層，所以答案像課本定義。也有學生寫了企業故事，但沒有用商科概念，所以答案像聊天。真正成熟的答案，是三層同時存在。

Worked contrast

Weak:

Promotion is important because it helps a business attract customers.

Better:

Promotion may be important for Harbour Bean Cafe because the business needs to increase weekend customer visits. A low-cost social media campaign could help the cafe communicate offers to nearby students, although its effectiveness would depend on whether the content reaches the target group consistently.

中文拆解

第二個句子更好，原因是它同時完成了三件事：

- 有 concept: promotion / social media campaign。
- 有 context: Harbour Bean Cafe、weekend customer visits、nearby students。
- 有 judgement: effectiveness depends on consistent reach。

這才是 assignment writing 需要的方向。

1.4 Why Chinese EAL learners often underperform in written assignments

Chinese EAL learners may have strong discipline, good memory and solid subject understanding. However, they often underperform in assignment writing for reasons that are not purely linguistic.

Problem 1: translating Chinese thinking too directly

Chinese writing may tolerate broad opening statements, moral judgements or general claims. English assignment writing normally expects the learner to make a controlled point, support it with evidence and apply it to the task. If the learner translates a Chinese-style paragraph directly, the English may sound vague or overconfident.

Weak pattern:

Nowadays social media is very developed, so businesses must use it.

This sentence sounds broad and unsupported.

Stronger pattern:

Social media may be suitable for a small cafe if the target customers already use the platform and the business can update content consistently.

Problem 2: using business terms without business reasoning

Some learners insert terms such as marketing mix, stakeholder, segmentation or cash flow, but the paragraph does not explain how the term affects the business decision.

Using a term is not the same as using a concept.

Problem 3: treating evidence as decoration

Evidence should not be placed at the end of a paragraph like decoration. It should shape the paragraph. If the evidence does not change the reasoning, it is probably not being used properly.

Problem 4: fearing evaluation

Many learners think evaluation means “write one advantage and one disadvantage.” This is too mechanical. Evaluation means making a reasoned judgement. It may include strengths and weaknesses, but it also needs conditions, priorities and a final view.

中國 EAL 學生常見的困難，不只來自語言能力，也來自英文 assignment 思維方式尚未建立。常見問題包括：

- 中文式開頭太大，例如「隨著社會發展……」。
- 英文術語很多，但沒有真正分析。
- 證據只是擺在段落裡，沒有被用來支持判斷。
- evaluation 被誤解成「寫一個優點和一個缺點」。

本書要訓練的，就是把這些習慣轉成更清楚、更合規、更像 business assignment 的寫法。

1.5 The assignment is not asking for personal opinion

Business assignments often ask learners to make recommendations. This does not mean the learner should simply write personal preferences. A recommendation must be justified.

Weak recommendation:

I recommend social media because I think it is the best.

This is personal opinion. It does not explain suitability.

Stronger recommendation:

A social media campaign may be the most suitable first option because it is relatively low-cost, can target local student customers and allows the cafe to test customer response before investing in a more expensive promotional method.

This recommendation is stronger because it gives reasons linked to cost, customer group and risk.

Recommendation checklist

Before writing a recommendation, check:

- Is the option realistic for the business size?
- Does it fit the target customer group?
- Is there evidence or reasoning to support it?
- Have I compared it with at least one alternative?
- Have I explained any limits or conditions?

Recommendation 不是「我建議」。在 assignment 裡，recommendation 必須有理由、有證據、有比較、有邊界。

中文思維可以先問：

- 這個方案為什麼適合這家企業？
- 它比另一個方案好在哪裡？
- 它有什麼限制？
- 老闆應如何判斷它是否有效？

如果不能回答這些問題，recommendation 就還不夠成熟。

1.6 Vocational business writing should remain practical, but not casual

BTEC Business is applied and vocational. This means the writing should connect to real business situations. However, vocational does not mean casual. The answer should still be structured, evidence-aware and academically responsible.

A practical answer:

- uses realistic business examples
- considers resources and constraints
- explains how decisions affect customers, staff or finance
- avoids exaggerated claims
- uses clear paragraph structure

A casual answer:

- uses personal opinion without support
- makes claims such as “this will definitely work”
- writes as if advising a friend
- ignores evidence and limitations
- uses informal wording

Vocational 不是「隨便寫得實用一點」。BTEC 的 applied learning 要求學生能把商科概念用到實際情境，但仍然要有結構、有證據、有學術邊界。實用不等於口語化，職業導向不等於沒有學術要求。

1.7 What this toolkit will train you to do

This toolkit trains a repeatable writing process. It should be used before, during and after drafting.

Before writing:

- read the brief
- mark the command word
- identify the business context
- plan evidence
- decide what level of judgement is needed

During writing:

- keep one point per paragraph
- link evidence to the business
- avoid unsupported general claims
- use cautious academic phrasing
- explain limits and conditions

After writing:

- check whether the answer matches the brief
- check whether evidence is real and relevant
- check whether paragraphs are descriptive or evaluative
- check whether AI or external support has been used safely

本工具箱不是只在寫不出來時才翻一下。它應該貫穿三個階段：

- 寫之前：讀 brief、圈動詞、定 evidence。
- 寫之中：按段落邏輯輸出。
- 寫之後：檢查是否答題、是否有證據、是否合規。

Chapter 1 quick self-check

Before moving to Chapter 2, the learner should be able to answer:

1. Why is assignment writing different from exam revision?
2. What is the difference between knowing a concept and applying a concept?
3. What are the three layers of a business assignment answer?
4. Why is “social media is popular” too weak as business reasoning?

5. What makes a recommendation more than a personal opinion?

中文自查

進入第二章之前，學生應該能說清：

1. assignment 寫作和考試複習有什麼不同？
2. 懂概念和應用概念有什麼不同？
3. 商科 assignment answer 的三層是什麼？
4. 為什麼「社交媒體很流行」不是有效商科分析？
5. recommendation 為什麼不能只是「我建議」？

Chapter 2. How To Read An Assignment Brief

2.1 Do not start writing before reading the brief

A common learner habit is to read the topic quickly and then begin writing from memory. This is risky. In BTEC assignments, small differences in wording can change the task.

Compare these instructions:

- Describe the marketing activities of a selected business.
- Explain how marketing activities support business aims.
- Analyse the effectiveness of marketing activities.
- Evaluate whether the marketing activities are suitable for the target market.

All four instructions may relate to marketing, but they do not ask for the same answer.

很多學生一看到 marketing、finance、HR，就立刻開始寫自己背過的內容。但 brief 中的動詞才是真正決定答案結構的地方。Describe、Explain、Analyse、Evaluate 不是同義詞。題目動詞不同，答案深度、證據使用和結論方式都不同。

An assignment brief should be read slowly, more than once. The first reading is for orientation: What is the broad topic? The second reading is for task control: What exactly must be produced? The third reading is for assessment risk: What evidence, format, deadline and academic-integrity conditions must be followed?

Many learners treat the brief as a topic sheet. This is not enough. A brief is closer to a contract between the learner and the assessment task. It tells the learner what kind of work is expected, what kind of evidence may be needed, and what kind of writing will be judged.

Assignment brief 不是「作文題目」。它更像一份任務合約。學生必須知道自己要交什麼、按什麼格式交、用什麼證據支撐、哪些事情不能做。如果只看 topic，不看 task instruction，就很容易寫偏。

2.2 The four parts of a brief

Although assignment briefs vary by centre, many contain four kinds of information:

1. **Scenario or context:** the business case, role or situation.
2. **Tasks:** what the learner must produce.
3. **Assessment criteria or learning aims:** what the task is connected to.
4. **Submission instructions:** format, deadline, word count, references and academic-integrity rules.

The learner should not treat these as separate decorations. They work together. The scenario limits the business context. The task tells the learner what to do. The criteria indicate the expected depth. The submission instructions control the practical delivery.

Brief part	What to look for	審題問題
Scenario	Business type, size, customer group, problem	題目給了什麼企業情境？限制是什麼？
Task	Command word and output type	我要 describe、explain、analyse 還是 evaluate？
Criteria	Level of thinking and evidence	這個任務是基本描述、應用分析還是評估判斷？
Submission	Format and rules	要 report、presentation、poster 還是 portfolio？引用和截止要求是什麼？

很多學生只看 task，不看 scenario。這會導致答案像通用商科筆記，而不是針對題目。也有學生只看 criteria，不看 submission format，最後內容可能有了，但格式不合要求。讀 brief 時要四個部分一起看。

2.3 The brief-reading formula

Before writing, mark the brief in three parts:

Command word + task object + evidence demand

Part	Question to ask	Example
Command word	What thinking action is required?	explain, analyse, evaluate
Task object	What exactly must I write about?	marketing activities, target customers, business problem

Part	Question to ask	Example
Evidence demand	What support is needed?	business data, example, observation, comparison

Example

Brief wording:

Explain how a small business could use a low-budget promotional campaign to attract local student customers.

Breakdown:

- Command word: Explain
- Task object: low-budget promotional campaign
- Business context: small business
- Customer group: local student customers
- Evidence demand: reasons why the campaign fits budget, business size and customer group

審題支架

這句題目不能只寫「促銷有哪些方法」。學生要注意四個限制：

1. small business: 小企業資源有限。
2. low-budget: 不能寫昂貴的大型廣告。
3. promotional campaign: 重點是推廣活動，不是整個 business strategy。
4. local student customers: 目標顧客是本地學生，不是所有顧客。

如果學生忽略這些限制，答案就會跑題。

Annotation method

Use a simple four-colour annotation system if allowed:

- Circle the command word.
- Underline the task object.
- Box the business context.
- Highlight the evidence or submission requirement.

If using a digital brief, copy the task into a planning document and annotate it before writing any paragraph.

Example annotation:

Explain how a **small business** could use a **low-budget promotional campaign** to attract **local student customers**.

Annotated meaning:

- Explain = give reasons and show links.
- Small business = keep recommendations realistic.
- Low-budget promotional campaign = focus on cost-conscious methods.
- Local student customers = target market must remain specific.

中文操作

可以把題目拆成四個框：

1. 動詞: Explain。
2. 企業限制: small business。
3. 任務對象: low-budget promotional campaign。
4. 目標顧客: local student customers。

拆完之後，學生就知道不能寫大型品牌 campaign，不能寫所有顧客，也不能只列 promotion methods。

2.4 Command words and writing depth

Command word	What it usually requires	中文操作提示
Describe	Say what something is like	描述特徵即可，但要準確，不要加入無關評論
Explain	Give reasons and show links	說清原因、關係、結果，不能只列點
Analyse	Break down the issue and show how parts connect	拆開問題，看因素之間如何互相影響
Compare	Show similarities and differences	不只是分別介紹 A 和 B，而要指出差異如何影響決策
Evaluate	Make a reasoned judgement	要有條件、有證據、有取捨，不能只寫優缺點
Recommend	Choose and justify a suitable option	要說明為什麼這個選擇比其他選擇更適合

Writing warning

Do not use the same paragraph style for all command words. A descriptive paragraph is not enough for an evaluative task. A recommendation without justification is not a recommendation; it is only an opinion.

最常見的失分方式，是題目要求 evaluate，但學生只寫 describe。另一種常見問題，是題目要求 recommend，但學生只寫「我建議……」卻沒有說明為什麼這個方案更適合該企業。

2.5 Command word ladder

The command words can be imagined as a ladder. The higher steps normally require more reasoning.

Step	Command words	Main writing move	中文理解
1	Identify, list, outline	State key points	說出是什麼
2	Describe	Give features or details	描述特徵
3	Explain	Give reasons and links	說明原因和關係
4	Analyse	Break into parts and show effects	拆解因素和影響
5	Compare	Judge similarities and differences	比較差異及其意義
6	Evaluate, justify, recommend	Make a reasoned judgement	作出有證據的判斷

This ladder is not a formal grading scale. It is a planning tool. It helps the learner check whether the paragraph is deep enough for the command word.

這個 ladder 是寫作自查工具，並非官方評分表。如果題目要求 evaluate，但學生段落只停留在 describe，就說明深度不夠。寫作時可以問：我現在是在說「是什麼」，還是在說「為什麼」，還是在作出「有條件的判斷」？

2.6 Task object: the part learners often miss

The command word is important, but the task object is equally important. The task object tells the learner what exactly must be discussed.

Compare:

- Evaluate the effectiveness of a promotional campaign.
- Evaluate the effectiveness of a recruitment process.
- Evaluate the effectiveness of financial planning.

The command word is the same: evaluate. But the task object changes the whole answer.

For a promotional campaign, the learner may need to discuss target customers, channels, message, cost and response. For recruitment, the learner may need to discuss job description, selection method, fairness, cost and quality of hire. For financial planning, the learner may need to discuss cash flow, budget control, forecasting and risk.

學生常常只圈動詞，不圈 task object。這是不夠的。Evaluate 只是告訴你「要評估」，但評估什麼？promotion、recruitment、finance，每一個對象需要的證據和概念都不同。

2.7 Evidence demand: what proof does the brief imply?

Some briefs state the evidence requirement clearly. Others imply it. The learner must learn to infer what evidence is needed.

If the task asks about a marketing campaign, possible evidence may include:

- target customer profile
- campaign cost
- social media engagement
- customer feedback
- sales pattern
- competitor activity

If the task asks about recruitment, possible evidence may include:

- job description
- person specification
- application process
- interview notes
- selection criteria
- training or turnover issues

If the task asks about finance, possible evidence may include:

- revenue and cost figures
- cash-flow forecast
- break-even point
- budget variance
- profit margin
- financial risk

Evidence 不是寫完正文後補一個 reference。Evidence 是一開始就要規劃的。不同 task object 需要不同證據。Marketing 需要顧客和渠道證據；recruitment 需要職位和選拔證據；finance 需要數字和預測證據。不能用同一套例子打天下。

2.8 Output type: report, presentation, portfolio or written response

Many learners focus only on content and forget the output type. A report is not written like a speech. A presentation is not structured like an essay. A portfolio may require evidence files, screenshots, tables or reflection notes.

Output type	What it usually needs	Common learner mistake
Report	headings, paragraphs, evidence, conclusion	writing one long essay without headings
Presentation	concise points, speaker notes, visuals	putting full paragraphs on slides
Portfolio	evidence items and commentary	uploading evidence without explaining it
Written response	direct answer to task wording	writing everything known about the topic

交付形式很重要。Report 要像 report，有 heading、有 evidence、有 conclusion。Presentation 要適合展示，不是把 essay 貼到 slide 上。Portfolio 不是文件堆積，要說明每個 evidence item 證明什麼。

2.9 The danger of writing from memory

Writing from memory feels fast, but it often causes three problems:

1. The answer becomes too generic.
2. The paragraph ignores the business scenario.
3. The learner forgets the exact command word.

For example, if the learner has memorised the marketing mix, they may write about product, price, place and promotion even when the task only asks for a promotional campaign. This wastes space and may weaken focus.

背過的內容不能直接倒進 assignment。Assignment 不是默寫商科筆記。學生要先看題目需要哪一部分知識，再選擇使用。多寫不等於高分，寫偏會降低答案質量。

2.10 Planning grid before writing

Before writing a paragraph, complete a small planning grid.

Question	Learner note
What is the command word?	
What is the task object?	
What business context must I use?	
What evidence do I need?	
What limitation should I consider?	
What output format is required?	

Example completed grid

Question	Learner note
What is the command word?	Explain
What is the task object?	Low-budget promotional campaign
What business context must I use?	Small cafe near a railway station
What evidence do I need?	Customer group, weekend sales issue, low-cost channels
What limitation should I consider?	Staff time, weak tracking, customer response uncertainty
What output format is required?	Short business report

這個 planning grid 看起來簡單，但能避免大量跑題。每一段寫之前都可以快速填一次。如果填不出 evidence 或 limitation，說明這一段還沒有準備好。

Chapter 2 quick self-check

Before moving to Chapter 3, the learner should be able to answer:

1. What are the four parts of an assignment brief?
2. What is the difference between command word and task object?
3. Why is evidence demand important before writing?
4. Why should output type affect writing style?
5. Why is writing from memory risky?

中文自査

進入第三章之前，學生應該能說清：

1. assignment brief 通常包含哪四個部分？
2. command word 和 task object 有什麼不同？
3. 為什麼 evidence 要在寫作前規劃？
4. 為什麼 report、presentation、portfolio 寫法不同？
5. 為什麼不能直接把背過的知識倒進 assignment？

Chapter 3. From Pass To Merit To Distinction Awareness

3.1 Grade awareness is not grade guarantee

This chapter does not provide a marking guide or grade guarantee. Learners must follow their centre-issued assessment criteria. However, students can improve their writing by understanding the general difference between basic completion, applied reasoning and evaluative judgement.

In simple terms:

- A weaker answer may describe.
- A stronger answer applies.
- A more developed answer evaluates.

這裡提供等級意識訓練；官方評分標準與 centre guidance 仍是最終依據。學生需要明白：低層次答案通常停留在「描述」，較成熟的答案會把知識應用到企業情境，高階答案會進一步判斷限制、條件和取捨。

Grade awareness means understanding the kind of thinking your writing needs to show. It is not a promise that a paragraph will receive a particular grade. The final assessment depends on the official brief, centre guidance, unit criteria, authenticity of learner work and assessor judgement.

However, a learner who cannot tell the difference between description, application and evaluation is likely to struggle. The learner may write a long answer but still remain at a basic level of thinking. Length alone does not create quality.

中文加強說明

「等級意識」的作用，是幫學生判斷自己的答案目前處於哪種思維層次：

- 我只是在描述事實嗎？
- 我有沒有把概念放進題目中的企業？
- 我有沒有用證據支持？
- 我有沒有比較方案、指出限制、作出判斷？

很多學生誤以為「寫得長」就更像高分答案。實際上，長而鬆散的 descriptive answer 仍然只是 descriptive。高質量答案不一定浮誇，但必須有清楚的 business reasoning。

3.2 The three movements: completion, application, judgement

For study-support purposes, this toolkit uses three broad movements:

Movement	Main question	Typical weakness	Stronger direction
Completion	Have I answered the task?	Missing parts of the brief	Cover the task accurately and relevantly
Application	Have I used the business context?	Generic textbook answer	Link the concept to the selected business
Judgement	Have I weighed evidence and limits?	Personal opinion or one-sided praise	Explain suitability, limits and conditions

This framework is not a substitute for official criteria. It is a planning tool. It helps the learner see whether an answer has moved beyond basic completion.

可以把 assignment 寫作看成三個動作：

1. **Completion**：我有沒有把題目要求做完？
2. **Application**：我有沒有把知識用到這家企業？
3. **Judgement**：我有沒有根據證據和限制作出判斷？

如果只完成第一步，答案通常是基本完成。如果做到第二步，答案開始有商科應用。如果做到第三步，答案才有更成熟的 evaluation quality。

Worked mini-example

Task direction:

Recommend one low-budget promotional method for a small cafe and explain why it may be suitable.

Completion:

The cafe could use a loyalty card. Customers can get a free drink after several purchases.

Application:

The cafe could use a loyalty card because it is located near a railway station and may have customers who pass regularly. This method may encourage repeat purchases without requiring a large advertising budget.

Judgement:

The loyalty card may be suitable as a first low-budget method because it encourages repeat visits and can be implemented easily at the point of sale. However, its impact on weekend sales may be limited if the main weekend customers are families rather than regular commuters. The owner should therefore track repeat visits and compare weekday and weekend use before judging whether the campaign has worked.

中文拆解

三個版本看起來都在講 loyalty card，但層次不同：

- 第一版只是說「可以用會員卡」。
- 第二版開始說「為什麼對這家 cafe 可能合適」。
- 第三版加入「限制、條件、衡量方式」，所以更像 evaluation。

3.3 What a Pass-level answer often does

A Pass-level direction usually requires the learner to complete the task clearly and relevantly. The learner should show basic understanding of the business concept and connect it to the assignment question.

Example of Pass-level thinking:

The cafe could use a loyalty card to encourage customers to return. This may help because customers can receive a free drink after several purchases.

This is relevant and understandable. It shows the basic idea. However, it does not yet apply much evidence or judge limitations.

Pass-level 的基本方向是「任務完整、概念正確、與題目相關」。但如果答案只停在這裡，通常會比較平。學生應把它當成地基，而不是最終目標。

At this level of writing, the learner should avoid two problems. The first problem is incomplete task coverage. For example, the learner may describe a promotional method but forget to connect it to the target customer group. The second problem is inaccurate concept use. For example, the learner may use “promotion” when the paragraph is really about price reduction, or use “market research” when the evidence is only personal opinion.

Basic completion still matters. A learner cannot build stronger analysis on top of an answer that does not answer the task. For this reason, Pass-level awareness should not be treated as unimportant. It is the foundation.

Pass-level checklist

- Does the answer address the correct task?
- Is the business concept used accurately?
- Is the answer relevant to the business scenario?
- Is there at least a basic reason or example?
- Is the writing clear enough for the reader to follow?

中文補充

Pass-level 不等於「很差」。它代表答案至少要完成任務、概念不能錯、內容不能跑題。很多學生一心想寫高級分析，反而忘了先把基本任務做完整。真正穩定的寫作，是先完成基本要求，再逐步增加 application 和 judgement。

Common weak Pass-level pattern

The business should advertise more because advertising can attract customers.

This is relevant but very thin. It uses a basic idea, but it does not identify the customer group, method, cost or context.

How to strengthen it slightly

The business could advertise a student discount on social media because local students may be more likely to respond to low-cost offers.

This is still simple, but it is more focused because it names the customer group and promotional method.

3.4 What a Merit-level answer often adds

A Merit-level direction often shows stronger application. The learner should use the business context more carefully and explain why a method fits the specific situation.

Example of Merit-level thinking:

The loyalty card may be suitable for Harbour Bean Cafe because the business is located near a railway station and may attract repeat weekday customers. If student customers already pass the café regularly, a loyalty incentive could encourage repeat purchases without requiring a large advertising budget.

This is stronger because it applies the method to the café's situation.

Merit-level 的關鍵是 application。學生不能只寫「會員卡可以增加回頭客」，而要說「對這家靠近車站的小咖啡店而言，會員卡為什麼可能有效」。這就是把知識放回題目。

Application is not the same as adding a business name. A learner may write "Harbour Bean Cafe should use social media" many times, but the paragraph may still be generic if it does not explain why social media fits the café's problem, customers, resources or aims.

Stronger application normally includes at least two of the following:

- a feature of the selected business
- a specific customer group
- a relevant resource or constraint
- a piece of evidence
- a comparison with another option
- an explanation of how the method affects the business aim

中文補充

Application 不是把企業名字塞進句子裡。真正的 application 要讓讀者看出：這個答案只能是針對這家企業寫的，而不是換成任何企業都能用。

例如：

- 弱 application: Harbour Bean Cafe should use Instagram because Instagram is popular.
- 強 application: Harbour Bean Cafe may use Instagram to reach local students because the café needs a low-cost channel and students may respond to short visual offers, but the business would need consistent posting to make this method effective.

後者更像 application，因為它同時提到 business need、customer group、cost constraint 和 limitation。

Merit-level development frame

Use this pattern when trying to move beyond basic description:

1. Name the business issue.
2. Select the relevant concept or method.
3. Explain why it fits this business.
4. Add evidence or realistic reasoning.
5. Mention one practical constraint.

寫作支架

可以用中文先規劃：

- 這家企業的問題是什麼？
- 我選的商科工具是什麼？
- 這個工具為什麼適合這家企業，而不是任何企業？
- 我有什麼證據或合理推理？
- 有什麼實際限制？

再轉成英文段落。

3.5 What a Distinction-level answer often adds

A Distinction-level direction often requires more judgement. The learner should consider strengths, limits, trade-offs and conditions.

Example of evaluative thinking:

The loyalty card may be useful as a low-cost method, but its effectiveness depends on whether the café can track repeat visits and communicate the offer consistently. If weekend footfall is mainly from families rather than regular student commuters, the loyalty card may be less effective for weekend growth than a bookstore partnership or family-focused promotion.

This is stronger because it does not simply praise the method. It judges the conditions under which the method may or may not work.

Distinction-level 的核心在於更成熟的判斷。高階答案會回答：

- 這個方案在哪些條件下有效？
- 最大限制是什麼？
- 有沒有其他方案更適合？
- 企業應如何衡量是否成功？

只在最後加一句 “However, there are disadvantages” 不是真正 evaluation。

Evaluation is often the hardest step for EAL learners because it requires careful academic judgement. It is not enough to praise a recommendation and then add a short sentence beginning with “However.” The limitation must affect the judgement.

For example:

Weak evaluation:

Social media is good, but it also has disadvantages.

This sentence names the existence of disadvantages, but it does not evaluate anything.

Stronger evaluation:

Social media may be suitable as a low-cost awareness tool, but it may not solve the café’s weekend sales problem unless the campaign reaches weekend customers rather than only weekday commuters.

This is stronger because the limitation is connected to the business aim.

Evaluation questions

When evaluating, ask:

- Suitable for what aim?
- Suitable for which customer group?
- Suitable under what conditions?
- What evidence is missing?
- What risk could reduce effectiveness?
- What alternative might be stronger?
- How should success be measured?

中文補充

Evaluation 要避免「假評估」。假評估常見句型是：

- This has advantages and disadvantages.
- This may be good but also bad.
- This depends on many factors.

這些句子本身沒有錯，但如果不說清楚 advantage 是什麼、disadvantage 如何影響企業、depends on 哪些 factors，就沒有真正完成 evaluation。

真正的 evaluation 要把 limitation 拉回企業目標。例如：

- 如果目標是增加 weekend family customers，只針對 student commuters 的 loyalty card 可能效果有限。
- 如果 café 沒有人負責定期更新內容，social media campaign 可能無法持續。
- 如果沒有 tracking method，owner 很難知道 promotion 是否真的提升了 repeat visits。

這些才是能推動 judgement 的限制。

3.6 How one answer can move through the levels

The same topic can be developed in stages. This helps learners understand that stronger writing is built by adding application and judgement, not by memorising a “high-level phrase.”

Topic:

A small cafe wants to improve customer loyalty.

Stage 1: basic relevant answer

The cafe can use a loyalty card. This can make customers come back because they can get a free drink.

Stage 2: applied answer

The cafe can use a loyalty card because it is a low-cost method that may encourage repeat purchases from customers who pass the railway station regularly. This may be useful for a small business because it does not require expensive advertising.

Stage 3: evaluative answer

The loyalty card may be a realistic first option because it is low-cost and easy for staff to explain at the point of sale. However, it may be more effective for regular weekday customers than for occasional weekend family visitors. The owner should compare repeat visits before and after the card is introduced and consider pairing it with a weekend family offer if the main aim is to improve weekend sales.

中文拆解

三個版本的差異主要來自思維深度：

- Stage 1 有基本相關性。
- Stage 2 有 business context。
- Stage 3 有 suitability、limitation、measurement 和 alternative direction。

學生不要迷信複雜詞。清楚、具體、有證據、有判斷，才是更成熟的寫作。

3.7 What not to do: fake upgrading

Some learners try to make an answer look stronger by adding academic-looking words. This is fake upgrading. It does not improve the answer if the reasoning is still weak.

Fake upgrade 1: adding long introductory phrases

Weak:

In today’s increasingly competitive business environment, promotion is very important.

This sounds formal, but it does not answer the task.

Better:

Promotion may be important for Harbour Bean Cafe because the business needs to increase weekend customer visits without using a high-cost advertising campaign.

Fake upgrade 2: adding “evaluate” vocabulary without evaluation

Weak:

This method is effective. However, it has disadvantages. Therefore, it is good.

Better:

This method may be effective for repeat weekday customers, but it may be less effective for attracting new weekend visitors unless the cafe promotes the offer through channels used by families and local students.

Fake upgrade 3: using data without explaining it

Weak:

Sales are 20% lower at weekends, so the campaign is good.

Better:

If weekend sales are 20% lower than weekday sales, the cafe needs a campaign that specifically reaches weekend customers. A general weekday loyalty card may not fully address this problem unless it is adapted for weekend visitors.

假升級是中國學生常見問題：句子看起來正式，但 reasoning 沒有變強。真正的升級，需要讓證據改變你的判斷，而不只是加長句、加 however 或加數據。

3.8 Evidence and judgement must work together

Evidence alone does not create evaluation. The learner must explain what the evidence means for the business decision.

Evidence	Weak use	Stronger judgement
Weekend sales are lower than weekday sales.	The cafe should do promotion.	The cafe needs promotion aimed at weekend customers, not only regular weekday commuters.
Students pass the station regularly.	Students will buy more coffee.	A loyalty card may encourage repeat purchases if students already pass the cafe frequently.
The cafe has limited budget.	It cannot do marketing.	Low-cost methods may be more realistic, but they require consistent staff execution.
A bookstore is nearby.	The bookstore can help.	A partnership may reach similar local customers, but results depend on shared promotion quality.

Evidence 需要被轉化為 judgement。學生要說明「這條證據對決策意味著什麼」。例如 weekend sales low 這條證據，不能直接證明任何 promotion 都好；它更適合支持 promotion 必須針對 weekend customers 這一判斷。

3.9 The role of cautious language

Business assignments often require careful wording. Avoid absolute claims unless the evidence clearly supports them.

Risky wording:

- This will increase sales.
- Customers will like this.
- Social media is the best method.
- The business must use this strategy.

More careful wording:

- This may increase awareness among local students.
- This could encourage repeat visits if customers value the reward.
- Social media may be a suitable first method because it is low-cost.
- The business should consider this option if it can update content consistently.

英文商科寫作很重視 cautious language。中文裡學生可能習慣寫「一定會」「必然」「最有效」，但 assignment 裡如果沒有強證據，這些詞會顯得過度。更安全的詞包括 may、could、is likely to、depends on、provided that。

3.10 Building a paragraph upward

Use this process to upgrade a paragraph:

1. Write the basic point.
2. Add the business context.

3. Add evidence or realistic reasoning.
4. Add a limitation.
5. Add a judgement or recommendation.

Basic point:

The cafe could use social media.

Add business context:

The cafe could use social media to reach local student customers.

Add evidence or reasoning:

This may be suitable because social media is a low-cost channel and students may respond to short visual offers.

Add limitation:

However, this method may be limited if the cafe does not post consistently or if the content does not reach weekend customers.

Add judgement:

Therefore, social media may be useful as an awareness tool, but the owner should track engagement and weekend visits before judging whether it has improved sales.

中文操作

每段可以按五步升級：

1. 我想說什麼？
2. 這和題目中的企業有什麼關係？
3. 我有什麼證據或合理推理？
4. 這個觀點有什麼限制？
5. 所以我作出什麼判斷？

這比直接追求「高級句子」更可靠。

Chapter 3 practice task

Read the paragraph below:

The cafe should use TikTok because many people use TikTok and it is popular. This will help the business get more customers. It is a good method.

Improve it in three stages:

1. Add business context.
2. Add evidence or realistic reasoning.
3. Add limitation and judgement.

Possible planning notes

- Business context: small cafe, local students, weekend sales problem.
- Evidence/reasoning: low-cost channel, visual offers, student audience.
- Limitation: staff time, consistency, whether weekend customers use TikTok.
- Judgement: useful for awareness, not enough by itself to prove sales growth.

中文練習提示

不要直接把原句改得更長。先判斷它弱在哪裡：

- 「many people」太泛。

- 「will help」太絕對。
- 「good method」沒有判斷依據。

改寫時要讓句子回答：對這家 cafe、這類顧客、這個問題，TikTok 為什麼可能有用，又為什麼可能有限？

Chapter 3 quick self-check

Before moving to Chapter 4, the learner should be able to answer:

1. What is the difference between completion, application and judgement?
2. Why is application more than adding a business name?
3. What makes evaluation stronger than listing advantages and disadvantages?
4. Why can cautious language improve academic writing?
5. How can evidence change a recommendation?

中文自査

進入第四章之前，學生應該能說清：

1. completion、application、judgement 有什麼不同？
2. 為什麼 application 不只是把企業名字寫進去？
3. 為什麼 evaluation 不是優缺點清單？
4. 為什麼 may、could、depends on 這類語言更適合商科寫作？
5. 證據如何影響 recommendation？

Chapter 4. Evidence Planning

4.1 Evidence should be planned before writing

Many learners write first and then search for evidence later. This usually creates weak paragraphs. Evidence should be planned before the paragraph is written. In a BTEC Business assignment, evidence is not decoration. It is the material that allows the learner to show application, explain business reasoning and move beyond personal opinion.

Evidence planning is especially important for Chinese-speaking EAL learners because the first draft is often driven by a strong general idea in Chinese: “this business should advertise more”, “the manager should reduce costs”, “staff training is important”, or “customers like discounts”. These ideas may be reasonable, but they are not yet assignment-ready. The learner needs to ask: what type of evidence would make this idea credible in the brief? Does the evidence come from the case, from an external source, from a calculation, from an observation, or from a business framework? How strong is the evidence? What can it prove, and what can it not prove?

Good evidence planning changes the writer’s behaviour. Instead of asking, “What can I say?”, the learner starts asking, “What can I support?” This is a major shift. It prevents paragraphs from becoming broad essays about business in general and helps the learner stay close to the assignment brief.

An assignment paragraph needs evidence for three reasons:

1. To show that the point is grounded in the business case.
2. To avoid unsupported claims.
3. To help the learner move from opinion to academic reasoning.
4. To make comparison and evaluation possible.
5. To protect the learner from invented examples or overconfident statements.

Evidence also helps with time management. If the learner has planned the evidence before writing, the paragraph can be built more calmly. If the learner writes without evidence, the draft often becomes longer but weaker. The student may spend hours producing sentences, then discover that the paragraph still does not answer the command verb. In this sense, evidence planning is not an extra task. It saves time.

不要先寫一大段，再最後硬塞一個 reference。更好的方法是先想：我要證明什麼？我需要什麼證據？這個證據能不能支持我的 point？

中國學生常見問題是想法沒有被證據固定住。比如“這家公司應該做 social media marketing”本身不是錯，但如果沒有說明目標客群、平台使用習慣、預算限制、內容更新能力、衡量方法，這句話就只是建議，不是 BTEC assignment 中可評分的 applied analysis。

寫作前先問三個問題：

1. 這條證據來自哪裡？
2. 它支持哪一個 point？
3. 它最多能證明到什麼程度？

第三個問題尤其重要。很多證據只能支持 may / could / is likely to，不能支持 will definitely。這就是 Level 3 商科寫作要慢慢建立的 academic caution。

4.2 What counts as evidence in BTEC Business writing?

Evidence in BTEC Business writing can take several forms. It does not always have to be a long academic journal article, especially at Level 3. However, it must be relevant, credible and used honestly.

The most common evidence types are:

1. **Case evidence:** details supplied in the assignment scenario, business brief, learner’s selected organisation or centre-issued case material.
2. **Business data:** sales figures, customer numbers, costs, budgets, market share, staffing levels, stock movement, website traffic or survey results.
3. **Framework evidence:** concepts from marketing, finance, operations, human resources or enterprise theory that help interpret the case.
4. **External context:** market trends, competitor examples, customer behaviour, regulation, economic conditions or technology changes.
5. **Learner-produced evidence:** observations, interviews, small surveys, screenshots, tables, calculations or planning documents where the centre allows them.
6. **Academic or professional sources:** textbooks, awarding-organisation learning materials, business reports, reputable websites, government statistics and professional bodies.

Different units use evidence differently. A marketing unit may require customer segmentation, promotional aims and campaign evidence. A finance unit may require calculations and interpretation. A recruitment or HR unit may require job descriptions, person specifications, training plans or performance-management evidence. An enterprise unit may require risk evidence, resource planning and feasibility judgement.

This means the learner should not build one generic evidence pack for every assignment. Evidence must be matched to the unit, the command verb and the assessment criteria.

Evidence 不等於“隨便找一個網頁引用”。Level 3 的 evidence 可以包括案例材料、數據、表格、調查、觀察、框架、教材概念、政府或行業資料。關鍵是：它是否能支持你的具體段落？

比如：

- Marketing assignment 需要 customer segment、promotion channel、campaign aim、budget awareness。
- Finance assignment 需要 calculation、cash flow、cost/revenue logic、financial interpretation。
- HR assignment 需要 job role、skills requirement、training method、performance evidence。
- Enterprise assignment 需要 risk、resource、market need、feasibility。

如果所有科目都用同一種 evidence，文章會很空。BTEC 寫作需要根據 unit 選 evidence。

4.3 Evidence planning matrix

Writing claim	Evidence needed	Chinese check	Academic integrity warning
The cafe needs to improve weekend sales.	Weekly sales pattern, owner observation, customer count	這條證據是用來證明問題存在	不可編造精確銷售數字
Students may respond to loyalty incentives.	Student footfall, customer survey, competitor examples	這條證據只能支持「可能」，不能支持「一定」	不要說所有學生都喜歡折扣
A bookstore partnership could extend reach.	Shared customer profile, local partnership example	這條證據支持低成本合作的合理性	不要把合作寫成保證銷售增長
Social media may increase awareness.	Platform use, local engagement, campaign examples	這條證據支持 awareness，不一定支持 sales	不要把 likes 直接等同於 revenue

The matrix should be completed before drafting. It forces the learner to connect claim, support and caution. This is important because weak assignment paragraphs often contain claims that sound business-like but have no evidence pathway.

For example, “The cafe should use TikTok” is not yet an evidence-based claim. It becomes more useful when the learner writes: “The cafe could test short-form video content if its target customer group includes local students who regularly use mobile social platforms, but this would need staff time, consistent posting and a way to track whether awareness becomes repeat visits.” This sentence does not guarantee success. It uses evidence, conditions and limitation.

The learner can use a simple four-column planning sheet:

Assessment point	My claim	Evidence source	What this evidence can prove
Recommend a promotional method	A loyalty card may be suitable	Location near station; repeat commuter customers; low printing cost	It can support suitability for repeat purchase, not guaranteed profit
Explain training needs	New staff may need product and service training	Customer complaints; service delay; product knowledge gaps	It can support a training need, not prove all staff are weak
Compare finance options	A small loan may allow faster purchase of equipment	Equipment price; expected cash flow; interest cost	It can support feasibility if repayment is realistic
Evaluate market research	A small survey may give useful initial insight	Survey questions; sample size; customer group	It can support limited local insight, not a full market conclusion

evidence planning matrix 的目的，是防止文章變成空話。每一個 claim 後面都應該能回答：

- 我這句話靠什麼支持？
- 這個證據是 strong、limited 還是 only suggestive？
- 我有沒有把證據說得太滿？
- 這條證據能不能回到 assignment brief？

如果學生能在寫作前完成這張表，正式段落通常會更短、更穩、更像英國課程下的 assignment。

4.4 Weak evidence and stronger evidence

Weak evidence	Why it is weak	Stronger evidence direction
“Everyone uses social media.”	Too general and unsupported	Identify which customer group is likely to use the channel
“The cafe will earn more money.”	No mechanism or evidence	Explain how repeat visits or awareness may affect revenue
“Students like discounts.”	Stereotype and too broad	Use local student footfall or a modest survey

Weak evidence	Why it is weak	Stronger evidence direction
"The partnership will be successful."	Guaranteed claim	Explain conditions that may influence success

Weak evidence is not always false. Sometimes it is simply too broad. "Students like discounts" may contain a possible truth, but it is not precise enough for a business assignment. Which students? In what location? For what product? How often? At what discount level? Would the discount increase sales volume enough to protect profit margin? The moment the learner asks these questions, the writing becomes more analytical.

Stronger evidence does not mean dramatic evidence. It often means narrower evidence. A small but relevant customer count may be more useful than a broad statement about society. A simple table of weekday and weekend sales may be more useful than a long paragraph about marketing theory. A short competitor comparison may be more useful than a vague claim that the business should be "more competitive".

The learner should also distinguish between evidence and interpretation. Evidence might show that weekend sales are lower than weekday sales. Interpretation explains what this may mean: perhaps the cafe depends on commuters and has not yet attracted leisure customers. Recommendation then proposes a response: test a weekend family offer, collaborate with a nearby bookstore, or promote a study-friendly seating area. Evaluation then asks whether the response is realistic: budget, staff time, location, customer behaviour and measurement.

弱證據通常有三個特徵：太大、太絕對、太像常識。比如「everyone」「always」「will definitely」這類寫法，在商科 assignment 中通常很危險。更好的表達是 may、could、is likely to、depends on。

還有一種弱證據是“看起來有數字，但數字沒有來源”。例如：

- The cafe will increase sales by 50%.
- The campaign will attract 500 new customers.
- Most students will buy the product.

如果 brief 沒有提供，學生也沒有調查，這些數字不能自己編。BTEC assignment 對 evidence 的基本要求是 honest and traceable。你可以做 reasonable estimate，但要說清楚 assumption；不能把猜測寫成事實。

4.5 Source hierarchy: which evidence is stronger?

Not all sources carry the same weight. A learner does not need to use university-level academic literature for every sentence, but the source should fit the purpose.

Evidence source	Usually useful for	Limitation
Centre-issued assignment brief	Understanding the task and scenario	It may not contain enough detail for full analysis
Business case material	Application to the selected organisation	Must not be stretched beyond what it says
Textbook or learning material	Concepts, definitions and frameworks	Must be applied, not copied as general theory
Company website	Products, mission, services, locations	Promotional language may be biased
Government statistics	Market, population, employment or economic context	May be broad and not directly local
Industry report	Trends, consumer behaviour, sector evidence	May be costly, selective or too advanced
Small learner survey	Local customer insight	Sample size may be limited
Interview or observation	Practical context and operational detail	May be subjective or incomplete

The learner should choose sources based on function. If the paragraph explains a marketing concept, a textbook or learning material may be appropriate. If the paragraph applies the concept to a selected business, case evidence or business-specific data is needed. If the paragraph evaluates feasibility, the learner may need budget, resources, customer behaviour and operational limits.

Source hierarchy 的意思是：不同來源有不同用途。公司官網可以說明公司提供什麼服務，但它不一定能客觀證明公司表現很好。政府統計比較可信，但可能太宏觀，不能直接證明某家小企業一定會成功。學生小調查貼近本地，但樣本小，所以表述要謹慎。

不要用一種來源承擔所有功能。比較好的段落通常會混合使用：

- textbook concept 解釋概念；
- case evidence 回到企業；
- simple data 支持問題；
- cautious judgement 說明限制。

4.6 Evidence log for learners

An evidence log is a simple table where the learner records useful evidence before writing. It should be practical, not bureaucratic. The purpose is to prevent the student from losing sources, mixing sources or forgetting how evidence connects to the assignment criteria.

Evidence item	Where it came from	Which paragraph it may support	Notes for cautious use
Weekend sales are lower than weekday sales	Case data / business notes	Problem identification; marketing recommendation	Need exact period if available; do not assume cause
Many customers pass the shop during morning commute	Observation / location description	Target customer and loyalty method	Stronger for weekday commuters than weekend families
Competitor offers student discount	Competitor website / local observation	Promotional comparison	Does not prove discount will work for this business
Owner has limited budget	Case brief / interview note	Feasibility and recommendation limits	Supports low-cost options
Staff struggle to explain new product range	Manager comment / customer complaint	Training need and service quality	Should be linked to role and performance

The log should be updated as the learner writes. Sometimes evidence that looks useful at the start becomes less relevant later. Sometimes a paragraph changes direction and needs different support. A good evidence log allows the learner to make these changes without losing control of the assignment.

Evidence log 是學生寫 assignment 前最值得建立的工具。它是防止自己寫作混亂的工作表。

每條 evidence 都要記三件事：

1. 來源是哪裡；
2. 支持哪一段；
3. 使用時有什麼限制。

如果第三欄和第四欄填不出來，說明這條 evidence 可能只是“看起來相關”，但還沒有真正進入寫作邏輯。

4.7 Matching evidence to Pass, Merit and Distinction writing

Evidence can support different levels of response depending on how it is used. The same piece of evidence may produce a simple Pass-level statement, a stronger Merit-level explanation or a more evaluative Distinction-level judgement.

For example, consider this evidence:

The cafe is located near a railway station and receives many weekday commuter customers, but weekend sales are lower.

A descriptive use may be:

The cafe is near a railway station and has many weekday customers.

This may support basic application, but it does not yet explain what the evidence means.

A more analytical use may be:

Because the cafe is near a railway station, a loyalty card may encourage repeat purchases from weekday commuters who pass the business regularly. However, this evidence is less useful for solving weak weekend sales because weekend customers may have different reasons for visiting the area.

This is stronger because it applies the evidence to a recommendation and recognises a limit.

A more evaluative use may be:

A loyalty card is likely to be a low-risk starting point for weekday retention, but it should not be treated as the main solution to weekend decline unless the cafe gathers evidence about weekend customer segments. A partnership with a nearby bookstore or weekend event venue may be more relevant if the problem is not repeat weekday trade but lack of leisure footfall.

This is stronger again because it compares options and uses evidence to guide judgement.

同一條 evidence 可以寫出不同層次：

- Pass: 我有提到 evidence。
- Merit: 我解釋 evidence 和企業問題的關係。
- Distinction: 我用 evidence 比較選項、指出限制、形成 judgement。

所以升級答案需要更精準地使用 evidence。尤其要注意：evidence 的價值取決於它是否貼合 assessment point。

4.8 How to avoid fabricated evidence

One of the most serious risks in assignment writing is fabricated evidence. This can happen when a learner feels pressure to make the paragraph sound specific. The student may invent sales numbers, survey results, customer percentages, competitor prices or interview comments. This is dangerous. It can create academic integrity problems and weaken trust in the work.

Learners should use three safer strategies:

1. **Use available evidence honestly.** If the brief says sales are low, use that. Do not invent exact monthly figures unless provided.
2. **Use cautious estimation.** If estimating, label it clearly as an assumption or projection.
3. **Use evidence gaps as evaluation.** If data is missing, say what further evidence the business should collect.

For example, a weak and risky sentence is:

The cafe will gain 300 new customers in one month.

A safer sentence is:

The cafe cannot assume a fixed increase in customers without tracking campaign response, but it could measure new customer visits through a simple discount code or loyalty-card sign-up record.

This sentence is academically stronger because it recognises uncertainty and proposes evidence collection.

不要為了讓文章“看起來具體”而編數字。沒有來源的精確數字比沒有數字更危險。可以寫：

- The business could track...
- The owner should collect...
- This cannot be confirmed without...
- A small survey may help identify...

這些句子比亂寫 30%、500 customers、sales will double 更可靠。

4.9 Evidence gaps can become evaluation

Many learners think missing evidence is a weakness that must be hidden. In fact, identifying evidence gaps can strengthen evaluation. Business decisions are often made under uncertainty. A good assignment answer can explain what is known, what is not known and what should be measured next.

For example:

The cafe has evidence of weak weekend sales, but the case does not show whether the problem is low footfall, weak conversion, unsuitable products or limited awareness. Therefore, the owner should collect weekend customer data before choosing between promotion, product changes or partnership activity.

This is a mature response. It does not pretend to know everything. It uses the evidence gap to make a practical recommendation.

Evidence-gap evaluation is useful in many business units:

Unit area	Evidence gap	Better evaluative response
Marketing	No customer-segment data	Recommend a small survey before choosing channels
Finance	No cash-flow forecast	Avoid recommending borrowing until repayment is assessed
HR	No staff-performance data	Identify training need cautiously and suggest observation
Operations	No stock-loss figure	Recommend tracking before changing supplier or stock system
Enterprise	No competitor pricing	Treat pricing strategy as provisional

看不見資料時，不要假裝看見。可以把“資料不足”變成 evaluation。這在英國商科寫作中很重要，因為真實 business decision 經常是在有限證據下做合理判斷。

好句型：

- The available evidence suggests..., but it does not show...

- This recommendation would be stronger if the business collected...
- Without data on..., the conclusion should remain cautious.
- Before implementing this option, the owner should test...

4.10 Chapter 4 practice task

Use the Harbour Bean Cafe scenario or a business selected by the centre. Choose one recommendation and complete the evidence plan before writing a paragraph.

Planning question	Learner answer
What is my recommendation?	
Which assessment criterion does it answer?	
What case evidence supports the problem?	
What business concept or framework supports the method?	
What data would make the recommendation stronger?	
What limitation must I mention?	
What should the business measure after implementation?	

Then write one paragraph using this structure:

1. Point: state the recommendation.
2. Evidence: add case or source evidence.
3. Application: explain why it fits the business.
4. Limitation: identify what the evidence cannot prove.
5. Judgement: recommend what should be tested or measured.

寫作支架

先不要急著寫完整段落。先用中文檢查邏輯：

- 我的建議是什麼？
- 我靠哪條 evidence 支持？
- 這條 evidence 到底能證明什麼？
- 它不能證明什麼？
- 我最後的 judgement 是什麼？

再轉成英文時，避免使用 too strong 的語氣。Level 3 Business assignment 中，成熟的句子通常呈現“有條件地合理”的判斷。

Chapter 4 quick self-check

Before moving to paragraph writing, the learner should be able to tick the following:

- I know which evidence supports each paragraph.
- I can explain where the evidence came from.
- I know whether the evidence is strong, limited or only suggestive.
- I have not invented precise data.
- I have linked evidence to the selected business, not only to business in general.
- I have used evidence gaps as part of evaluation where relevant.
- I can explain the difference between evidence, interpretation, recommendation and judgement.

Chapter 5. Paragraph Writing Frames

5.1 Why paragraph frames help

A paragraph frame is not a model answer. It is a structure that helps the learner organise thinking. The learner must still use their own evidence, own business case and centre-issued brief. The frame is useful because many Level 3 Business learners do not fail because they have no ideas. They struggle because their ideas arrive in the wrong order. They state a recommendation before identifying the business issue. They add evidence after the judgement. They explain theory without applying it to the organisation. They write a limitation but do not connect it to the recommendation.

The purpose of a frame is to stop the paragraph from becoming a list of disconnected sentences.

In a BTEC assignment, a paragraph should usually do four things:

1. Make a clear point.
2. Support the point with relevant evidence.
3. Apply the evidence to the selected business or scenario.
4. Explain what this means for the task, including limits where relevant.

This is not the only possible structure, but it is a safe structure for learners who are building academic confidence. A strong paragraph is not simply longer. It has direction. Each sentence has a job. The reader can see why the sentence is there.

For Chinese-speaking learners, paragraph frames also help with English output. Many students can explain the business logic orally in Chinese but lose structure when writing in English. They may translate directly from Chinese and produce sentences such as “This method is very good and can make the company develop better.” The idea is not useless, but the English does not show evidence, application or judgement. A frame helps the learner convert business thinking into assessable academic writing.

寫作框架的作用，是幫學生按邏輯組織內容。真正要變動的是 evidence、business context 和 judgement。框架只是骨架，不是答案。

對中國學生來說，frame 的價值是把“中文腦中的道理”變成英語 assignment 可以評分的段落。不要把 frame 理解成範文。它提供的是段落秩序。

一個段落至少要回答：

- 我這段要說什麼？
- 我用什麼證據支持？
- 這個證據和企業有什麼關係？
- 這個觀點有什麼限制？
- 這段最後如何回到題目？

5.2 PEEAL frame

Step	Function	Sentence starter	中文作用
Point	State the main idea	One suitable method may be ...	先給出本段中心觀點
Evidence	Add support	This is supported by ...	用證據支撐，不要空口判斷
Explanation	Explain the link	This matters because ...	說清為什麼證據有用
Application	Apply to the business	In this business, ...	回到題目中的企業
Link / Limit	Link to judgement	However, this depends on ...	加入限制或連回問題

PEEAL is a teaching frame. It should not be applied mechanically to every sentence, but it gives learners a reliable route. The most important part is not the acronym. The most important part is the movement from claim to evidence to application.

Many weak paragraphs only contain Point and Explanation. They say what the learner thinks and why the learner thinks it, but they do not show evidence. Some paragraphs contain Point and Evidence, but no Application. They mention a source, but the reader cannot see why it matters to the selected business. Some paragraphs contain Point, Evidence and Application, but no Limit. These paragraphs may be adequate for basic analysis, but they often sound too certain.

The PEEAL frame helps the learner avoid these problems:

Common problem	Missing part of PEEAL	What to add
The paragraph sounds like opinion	Evidence	Add case data, source evidence, observation or business concept

Common problem	Missing part of PEEAL	What to add
The paragraph sounds like textbook summary	Application	Explain how the concept works in this organisation
The paragraph sounds too certain	Link / Limit	Add a condition, risk, dependency or further evidence need
The paragraph is a list	Explanation	Explain how one sentence leads to the next
The paragraph does not answer the task	Point / Link	Reconnect to the command verb and assessment focus

PEEAL 提醒學生：不要只有觀點，沒有證據；不要只有理論，沒有企業；不要只有建議，沒有限制。

最常見的弱段落是：

The business should use social media. Social media is popular. It can help the business get more customers. Therefore, this is a good method.

問題在於：沒有說哪個 customer group，沒有 evidence，沒有說該企業是否有能力持續更新內容，也沒有說如何衡量效果。

更好的段落要回答：為誰做？為什麼適合？靠什麼證據？有什麼限制？如何判斷是否有效？

5.3 Sentence functions inside a paragraph

Before writing a paragraph, the learner should understand sentence function. A paragraph is not a pile of sentences. Each sentence should perform a role.

Sentence function	Purpose	Example sentence starter
Topic sentence	Shows the paragraph focus	One suitable approach may be...
Evidence sentence	Supports the point	This is supported by...
Interpretation sentence	Explains what the evidence means	This suggests that...
Application sentence	Links to the selected business	For this business, this matters because...
Limitation sentence	Shows caution	However, this may be limited by...
Judgement sentence	Connects back to the task	Therefore, the business should...

The learner should not begin every paragraph with the same phrase. Variety matters. However, function matters more than style. A simple sentence with a clear function is better than a decorative sentence that does not help the assignment.

For example:

One suitable approach may be a loyalty card.

This is a clear topic sentence, but it is not enough.

This is supported by the cafe's location near a railway station, where weekday customers may pass the shop regularly.

This adds evidence and application.

However, this method may not solve weak weekend sales unless the cafe can also attract leisure customers.

This adds limitation.

Therefore, the owner should test the loyalty card with weekday commuters while collecting separate evidence on weekend customer behaviour.

This adds judgement.

寫段落時不要只想“我要湊字數”。應該想：這句話在段落中做什麼工作？

- Topic sentence: 告訴讀者我要說什麼。
- Evidence sentence: 證明我不是空口說。

- Interpretation: 解釋證據代表什麼。
- Application: 回到這家企業。
- Limitation: 指出限制。
- Judgement: 回到題目並作出判斷。

如果一段裡很多句子沒有明確功能，就容易變成流水帳。

5.4 Example paragraph skeleton

One suitable method for Harbour Bean Cafe may be a loyalty card because it is a low-cost way to encourage repeat purchases. This is supported by the cafe's position near a railway station, where some customers may pass the business regularly. In this business, a loyalty card could be realistic because it does not require a large advertising budget and can be explained easily at the point of sale. However, its effectiveness depends on whether the cafe can attract repeat customers at weekends, not only weekday commuters. Therefore, the owner should track repeat visits before judging whether the method has improved weekend sales.

中文拆解

- One suitable method...: 先提出方案。
- because...: 立即說明原因。
- This is supported by...: 加入情境證據。
- In this business...: 回到企業，不要泛泛談 marketing。
- However...: 指出限制。
- Therefore...: 作出行動建議或判斷。

This paragraph is not a model answer to be copied. It is a demonstration of movement. It moves from recommendation to evidence, from evidence to application, from application to limitation, and from limitation to judgement. The learner should replace the business, evidence and assessment focus with their own task.

The paragraph can be stretched or shortened depending on the assessment criterion. For a Pass-level explanation, the learner may need a clearer description of what a loyalty card is and why repeat purchase matters. For a Merit-level analysis, the learner may need to explain the relationship between commuter behaviour, repeat visits and low-cost promotion. For a Distinction-level evaluation, the learner may need to compare loyalty cards with another method, such as a partnership or weekend event promotion.

這段不是範文。不能整段照搬。它只是展示段落如何移動：

recommendation -> evidence -> application -> limitation -> judgement

學生真正要替換的是：

- business name;
- evidence;
- customer group;
- assessment criterion;
- limitation;
- final judgement.

5.5 中文到英文轉換

中文意思	不夠學術的英文	更好的英文
我覺得會員卡很好	I think loyalty card is very good.	The loyalty card may be suitable because it encourages repeat purchases.
社交媒體很多人用	Many people use social media.	Social media may help the cafe reach local student customers if the content is updated consistently.
這個方法也有缺點	This method also has disadvantages.	However, this method may be limited by staff time, weak tracking data and inconsistent promotion.
老闆應該看看有沒有效	The owner should see if it works.	The owner should monitor repeat visits and weekend sales before judging the effectiveness of the campaign.

Chinese-to-English conversion should not be word-for-word translation. The learner should convert the thinking function. For example, “這個方法很好” should not become “this method is very good.” In academic business writing, the learner should explain suitability, mechanism and condition.

Useful conversion patterns include:

中文思維	Academic English function	Better English pattern
這個方法適合這家公司	Suitability	This approach may be suitable for the business because...
這個方法可以增加顧客	Mechanism	This may increase customer visits by...
但也有風險	Limitation	However, the impact may be limited if...
還要看情況	Condition	The effectiveness depends on...
要先試一下	Evidence collection	The business should test this by...
不能保證成功	Caution	This should not be treated as a guaranteed solution because...

中英轉換的核心，是把中文意思轉成英文 academic function。中文裡一句“這個方法挺好”，在英文 assignment 裡可能要拆成三部分：

1. suitable for whom;
2. supported by what evidence;
3. limited by what condition。

5.6 Frames for different command verbs

Different command verbs need different paragraph shapes. Learners often use one paragraph style for every task, but this is risky. A paragraph for “describe” does not need the same level of judgement as a paragraph for “evaluate”. A paragraph for “compare” must include more than one option. A paragraph for “recommend” must link evidence to a practical decision.

Describe

Purpose: show what something is, what it includes or how it works.

Frame:

[Concept / method] refers to... It usually includes... In the context of [business], this may involve...

Example:

A loyalty scheme is a promotional method that rewards customers for repeat purchases. In the context of Harbour Bean Cafe, this may involve offering a free drink after a set number of purchases.

Chinese check:

描述不是評價。Describe 主要說清楚“是什麼”。不要在 describe 段落中突然寫太多 judgement。

Explain

Purpose: show why or how something matters.

Frame:

This matters because... The evidence suggests... Therefore, it may affect...

Example:

This matters because commuters who pass the cafe regularly may be more likely to respond to a simple repeat-purchase reward than customers who visit only once.

Chinese check:

Explain 要回答 because / how。不要只把 definition 重複一遍。

Analyse

Purpose: break down relationships between evidence, cause, effect and business context.

Frame:

This may lead to... because... In this business, the impact may be... However, this depends on...

Example:

A loyalty card may increase repeat visits because it gives regular customers a reason to return. In this business, the impact may be stronger on weekday commuters than weekend visitors because commuters pass the cafe more frequently.

Chinese check:

Analyse 要拆關係。你要說清楚 cause and effect, 不是只寫“有好處”。

Compare

Purpose: identify similarities, differences and relative suitability.

Frame:

Option A may be more suitable for... whereas Option B may be more suitable for... The key difference is...

Example:

A loyalty card may be more suitable for retaining weekday customers, whereas a bookstore partnership may be more suitable for reaching new weekend visitors. The key difference is that the loyalty card depends on existing repeat footfall, while the partnership may create access to a different customer group.

Chinese check:

Compare 不能只寫 A 一段、B 一段, 最後沒有比較。比較要有比較點: cost、risk、customer fit、time、evidence strength.

Evaluate

Purpose: make a supported judgement, including strengths, limits and conditions.

Frame:

Overall, [option] may be the stronger choice if... However, it should be treated cautiously because... The business should therefore...

Example:

Overall, a bookstore partnership may be the stronger weekend option if the cafe can reach leisure customers who are not already weekday commuters. However, it should be treated cautiously because the case does not provide evidence of shared customer demand. The business should therefore test the partnership through a short weekend offer before committing major resources.

Chinese check:

Evaluate 不是“寫優點缺點”。它要最後形成 judgement: 哪個更合適? 在什麼條件下? 為什麼?

5.7 Upgrading a weak paragraph

Learners often benefit from seeing a weak paragraph upgraded step by step.

Weak paragraph:

The cafe should use social media because many people use it. It is cheap and can help the cafe get more customers. This is a good method for the cafe.

This paragraph has a point, but it is weak. It uses “many people” without evidence. It says “cheap” without explaining staff time or content quality. It says “get more customers” without explaining which customers or how success would be measured.

Improved paragraph:

Social media may be a suitable awareness method for Harbour Bean Cafe if the business wants to reach local students and younger customers. This is because short updates, menu photographs and limited offers can be shared at low financial cost compared with paid local advertising. However, the

method still requires staff time and regular content, so it may not be effective if the cafe posts only occasionally. The owner should therefore use a simple tracking method, such as a discount code or customer question at purchase, before judging whether online attention has become actual customer visits.

Why it is stronger:

1. It identifies the target group.
2. It explains the mechanism.
3. It avoids saying social media is automatically successful.
4. It includes a limitation.
5. It recommends measurement.

升級段落的關鍵，是讓每一句都有功能。弱段落的問題是太泛、太絕對、沒有 evidence。強一點的段落會說：

- 對誰有用；
- 為什麼有用；
- 成本或限制是什麼；
- 如何測量；
- 不能保證什麼。

5.8 Paragraph bank for common BTEC Business topics

The following frames are not model answers. They are controlled sentence patterns for learners to adapt.

Marketing recommendation

One suitable marketing method may be [method] because it could help [business] reach [customer group]. This is supported by [evidence]. For this business, the method may be realistic because [application]. However, its effectiveness may be limited by [limitation]. Therefore, the business should [measurement or next step].

Marketing 段落必須說 customer group 和 channel fit。不要只說“promote more”。

Finance decision

[Finance option] may be suitable because it allows the business to [purpose]. The evidence suggests that [financial evidence]. However, this option may create pressure if [risk]. Therefore, the business should compare [cost / repayment / cash-flow impact] before making the decision.

Finance 段落不要只說“有錢就好”。要說 repayment、cash flow、cost、risk。

HR training need

Staff training may be needed because [performance issue]. This is supported by [evidence]. In this business, training could improve [skill or service area]. However, training may not solve the problem if [limitation]. The manager should therefore monitor [performance indicator].

HR 段落要避免把所有問題都歸咎於 staff。可能還有 process、management、resources 的原因。

Enterprise risk

One key risk is [risk]. This may affect the business because [impact]. The evidence suggests that [support]. The risk could be reduced by [response], although this may be limited by [constraint]. Therefore, the entrepreneur should [action].

Enterprise 段落要有 risk + impact + response，不要只列出風險名稱。

Customer service improvement

Improving [service area] may help the business because [customer impact]. This is supported by [customer evidence]. For this business, the improvement may be practical if [resource condition]. However, it should be measured through [indicator] rather than assumed to be successful.

Customer service 段落要說 customer experience 和 business outcome 之間的關係。

5.9 Avoiding formulaic writing

Frames are helpful, but formulaic writing is a risk. If every paragraph begins with “One suitable method may be...” and every paragraph ends with “therefore the business should...”, the work may sound mechanical. The learner should use frames as planning tools, then vary the language.

Alternative topic sentence patterns:

- A practical starting point for the business may be...
- The evidence suggests that the business should consider...
- In this scenario, the most realistic option may be...
- For a small business with limited resources, ... may be more suitable than...
- Before choosing a final method, the business should consider...

Alternative limitation patterns:

- This may be limited by...
- The main risk is...
- This conclusion should remain cautious because...
- The evidence does not yet show...
- The business would need to test whether...

Alternative judgement patterns:

- Therefore, this option should be tested before wider use.
- This makes the method suitable as a short-term action, but not a complete solution.
- On balance, this option is stronger if the business can...
- The recommendation is reasonable, provided that...
- Further evidence would be needed before committing significant resources.

框架不能讓文章像機器。學生可以先用 frame 起草，再把句式換得自然一點。關鍵是保留功能，不是保留固定句子。

5.10 Chapter 5 practice task

Choose one weak paragraph from your own draft. Do not rewrite the whole assignment. Work on one paragraph only.

Step 1: Label each sentence.

Sentence	Function
Sentence 1	Point / evidence / explanation / application / limitation / judgement?
Sentence 2	Point / evidence / explanation / application / limitation / judgement?
Sentence 3	Point / evidence / explanation / application / limitation / judgement?

Step 2: Identify what is missing.

- Is there a clear point?
- Is there evidence?
- Is the evidence applied to the business?
- Is there a limitation?
- Does the final sentence answer the task?

Step 3: Rewrite the paragraph using PEEAL or a command-verb frame.

Step 4: Check that the paragraph is still your own work and uses your own evidence.

Chapter 5 quick self-check

Before moving to academic integrity and final review, the learner should be able to tick the following:

- I can identify the function of each sentence in a paragraph.
- I can use a frame without copying a model answer.
- I can adapt paragraph shape to describe, explain, analyse, compare or evaluate.
- I can move from Chinese business thinking to English academic phrasing.
- I can add evidence and application rather than only opinion.

- I can add limitation without making the paragraph negative.
- I can vary sentence starters while keeping the paragraph structure clear.

Chapter 6. Academic Integrity And AI Use

6.1 Support is not substitution

A learner may use support to understand a task, improve vocabulary, plan evidence and review structure. A learner must not submit work that has been written for them by another person or generated in a way that breaches centre rules.

This toolkit supports learning. It does not provide submission-ready answers.

學習支持和替代完成作業不是一回事。學生可以使用工具理解題目、整理詞彙、建立提綱、檢查段落邏輯，但不能把他人或 AI 生成的內容當作自己的 assessed work 直接提交。

6.2 Safe and unsafe uses of AI

Use	Safer or unsafe?	Reason
Ask AI to explain the meaning of “evaluate”	Safer if checked	Helps understanding, but must be verified
Ask AI to generate a full assignment answer	Unsafe	May become academic misconduct
Ask AI to simplify a difficult paragraph from a textbook	Safer if used for understanding	Do not copy into the assignment
Ask AI to create fake sales data	Unsafe	Fabricated evidence
Ask AI to check whether a paragraph is descriptive or evaluative	Safer if the learner keeps authorship	Use as feedback, not as replacement writing

AI 最大風險在於學生失去 authorship。比較安全的用法是幫助理解、提問、檢查邏輯；危險用法是生成完整答案、編造資料、改寫到看不出學生自己寫作能力。

6.3 Authorship: why the work must still sound like the learner

Academic integrity is not only about avoiding copying. It is also about authorship. Authorship means that the learner can honestly explain how the work was produced, why the evidence was selected and what the written argument means.

In assignment-based learning, a centre may ask a learner to discuss their work, explain a draft, respond to tutor questions or revise a section. If the learner cannot explain the content, the work is at risk even if the words look fluent.

This is especially important for EAL learners. A paragraph that suddenly changes from simple learner English to highly polished business consultancy language can create suspicion. The aim is not to keep the writing artificially weak. The aim is to make improvement traceable. A learner should be able to show planning notes, vocabulary development, evidence choices and draft changes.

A useful test is simple:

- Can I explain this paragraph in my own words?
- Can I identify which evidence I used?
- Can I explain why I chose this recommendation?
- Can I show what I changed between drafts?
- Can I answer a teacher’s question about this paragraph without reading from the page?

If the answer is no, the learner may not have enough ownership of the work.

Authorship 不是「英文一定要寫得差」。學生當然可以提升英文，但提升要有痕跡。老師看到一篇突然像商業顧問報告一樣成熟的作業，卻發現學生說不清每一段怎麼來的，風險就很高。

學生要能說清：

- 這段話是什麼意思？
- 證據來自哪裡？
- 為什麼選這個 recommendation？
- 初稿到終稿改了什麼？
- 如果老師追問，我能不能不用背稿也解釋？

這些問題用來保護學生自己的 academic integrity。

6.4 The difference between support, editing and replacement

Learners often receive help from teachers, tutors, classmates, parents, online tools or AI systems. Not all help is the same. The learner must understand the difference between support, editing and replacement.

Type of help	What it looks like	Integrity risk	Safer use
Concept support	Someone explains what segmentation, cash flow or stakeholders mean.	Low if the learner writes independently.	Use notes to build your own explanation.
Brief interpretation	A tutor helps the learner identify command words and task objects.	Low to medium, depending on centre rules.	Keep it as planning guidance, not written answer.
Language correction	Someone corrects grammar or unclear sentences.	Medium if the correction changes meaning or authorship.	Ask for feedback on clarity, then rewrite yourself.
Structural feedback	Someone says the paragraph needs evidence or evaluation.	Usually safer if no answer is supplied.	Use feedback as a checklist.
Full rewriting	Someone rewrites the learner's answer into polished English.	High.	Avoid unless centre rules clearly permit limited editing.
Answer generation	AI or another person writes the answer from the brief.	Very high.	Do not use as assessed work.

The boundary can be remembered as:

Guidance helps the learner think. Replacement removes the learner from the work.

If a support tool gives the learner a question to consider, it is more likely to be safe. If it gives a complete paragraph that the learner could submit, it is more risky.

支持、修改、替代是三件不同的事。

- Support: 幫你理解概念、理解題目、想清結構。
- Editing: 幫你修語法、修句子，但可能會改變你的原意。
- Replacement: 別人或 AI 幫你完成作業。

BTEC assignment 最危險的是 replacement。學生可能以為「我只是讓 AI 潤色」，但如果 AI 已經重寫了觀點、證據、判斷和段落結構，這已經進入替代寫作風險。

6.5 A safer AI workflow for BTEC learners

If a centre permits limited use of digital tools, the learner should keep AI use within a controlled learning workflow. The safest workflow is not “brief in, answer out.” It is “question in, understanding out.”

Stage 1: Understand the task

Possible safer prompt:

Explain what the command word “analyse” usually asks a student to do in a business assignment. Do not write an answer to my assignment.

Purpose: The learner understands the writing depth.

Unsafe prompt:

Write my BTEC Business assignment for this task.

Risk: The output may become non-authored assessed work.

Stage 2: Build vocabulary

Possible safer prompt:

Give me five business phrases for discussing customer needs in simple academic English. Do not write a full paragraph.

Purpose: The learner improves vocabulary.

Unsafe prompt:

Rewrite my whole answer in high-level English.

Risk: The final work may no longer reflect the learner's own writing.

Stage 3: Check paragraph function

Possible safer prompt:

Look at this paragraph and tell me whether it is mostly descriptive, analytical or evaluative. Give feedback only; do not rewrite it.

Purpose: The learner receives diagnostic feedback.

Unsafe prompt:

Make this paragraph Distinction level.

Risk: The tool may generate upgraded content that the learner does not own.

Stage 4: Reflect and revise

The learner should revise manually after receiving feedback. The final paragraph should be written by the learner, using the learner's evidence, organisation and reasoning.

比較安全的 AI 使用方式，是讓 AI 幫你理解和檢查，而不是幫你產出最終答案。可以問：

- analyse 這個詞在商科作業裡通常要做什麼？
- 這段是 descriptive 還是 analytical？
- 我這段缺少 evidence 還是 evaluation？
- 給我一些可以學習的商科表達，但不要替我寫段落。

不要問：

- 幫我寫完整作業。
- 幫我把這段改成 Distinction。
- 幫我生成 sales data。
- 根據 brief 直接寫答案。

6.6 Evidence cannot be invented to make writing look stronger

One of the most serious risks in business assignments is fabricated evidence. AI tools can easily create invented statistics, fictional customer surveys, fake company data or references that look real but cannot be traced.

In BTEC Business writing, evidence does not need to be overly advanced, but it should be honest. If the learner has not collected customer feedback, they should not write "80% of customers prefer..." unless this figure comes from real evidence. If the learner is using a hypothetical scenario, they should clearly identify it as a scenario, not as real data.

Weak and risky:

A survey shows that 90% of students want cheaper coffee.

Safer if no survey exists:

If Harbour Bean Café has not yet collected customer feedback, it should treat student price sensitivity as an assumption and test it through a short survey before changing prices.

The second version is more academically responsible. It turns an evidence gap into a recommendation for evidence collection.

Evidence integrity checklist

Before using evidence, ask:

- Did I see this evidence myself?
- Can I record where it came from?

- Is it from the brief, a source, a survey, observation or a reasonable assumption?
- Have I separated real evidence from assumed evidence?
- Would I feel comfortable showing this source to my teacher?

不要為了讓作業看起來「有數據」而編數字。很多學生覺得「加一個百分比會更像分析」，但如果這個百分比沒有來源，就是 fabricated evidence。

沒有證據時，不要硬編。更好的方法是承認 evidence gap：

目前缺少顧客調查，所以企業應先做簡短 survey，再決定是否調價。

這反而更像真實 business thinking。

6.7 Keeping a source and support log

A simple log can protect the learner. It shows what sources were used, what support was received and how the draft developed. The log does not need to be complicated. It only needs to be honest and clear.

Date	Source or support used	What I used it for	What I wrote myself
12 Oct	Centre-issued assignment brief	Identified task, command word and required output	Wrote my own planning grid
13 Oct	Business textbook chapter on promotion	Checked meaning of promotional methods	Wrote my own explanation of social media promotion
14 Oct	AI tool	Asked whether my paragraph was descriptive or analytical	Rewrote paragraph myself after feedback
15 Oct	Teacher feedback	Teacher said I needed clearer evidence	Added source note and explained why evidence mattered

This kind of log helps the learner keep control of the work. It also encourages better study habits. Instead of collecting sources randomly, the learner begins to see how each source contributes to the assignment.

建議每個 assignment 都建立一個簡單 support log。這可以保護學生自己。尤其是使用 AI、補習、同學討論、老師 feedback 時，最好留下記錄：

- 我用了什麼？
- 用來做什麼？
- 哪些內容是我自己寫的？
- 我根據 feedback 改了什麼？

如果將來老師問「這段是你自己寫的嗎」，學生可以清楚說明寫作過程。

6.8 Teacher feedback should be used as direction, not copied as text

Teacher feedback is one of the most valuable parts of assignment-based learning. However, learners sometimes misunderstand feedback. If a teacher writes “add more analysis,” the learner may simply add the word “therefore” or “this means.” If a teacher says “apply to the business,” the learner may only add the business name once.

Feedback should be converted into action.

Feedback	Weak response	Stronger response
Add more evidence	Add a random statistic	Select relevant evidence and explain why it supports the point
Apply to the business	Mention the business name	Explain how the point affects that specific business
Develop analysis	Add more sentences	Explain cause, effect, consequence and implication
Evaluate	Add a disadvantage	Judge suitability, limitation and condition
Improve clarity	Use more difficult words	Make the paragraph more controlled and easier to follow

If a learner does not understand feedback, they should ask a clarification question. Asking “what does evaluation mean here?” is much safer than guessing or asking AI to rewrite the paragraph.

老師 feedback 應轉化為具體修訂行動。比如老師寫 “needs more analysis”，它要求你解釋：

- 原因是什麼？
- 對企業有什麼影響？
- 證據如何支持？
- 有什麼限制？

Feedback 要變成 action，不是變成裝飾詞。

6.9 Red flags before submission

Before submission, the learner should check for integrity red flags. These are signs that the work may create questions about authorship, evidence or compliance.

Red flag 1: language level suddenly changes

If one paragraph is simple learner English and the next paragraph uses advanced consultancy language, the learner should review whether the work has been over-edited or generated.

Red flag 2: evidence cannot be traced

If the learner cannot say where a statistic, quote or company fact came from, it should not be used as factual evidence.

Red flag 3: the paragraph answers a different task

AI-generated writing often sounds fluent but misses the exact task object. A fluent wrong answer is still wrong.

Red flag 4: the learner cannot explain their own recommendation

If the learner recommends a method but cannot explain why it fits the business, the paragraph needs more planning.

Red flag 5: the work sounds like a model answer

BTEC assignments should be authentic learner work linked to the specific brief and evidence. A generic model-answer style paragraph can be risky because it may not match the centre-issued task.

提交前要檢查幾個危險信號：

- 英文水平突然不一致。
- 數據找不到來源。
- 句子很漂亮，但沒有回答題目。
- 學生說不清自己的 recommendation。
- 內容像網上範文，不像根據本 centre brief 寫出的作業。

這些問題不一定代表學生作弊，但會增加風險。最好的做法是在提交前重寫成自己能解釋、能證明、能對應 brief 的版本。

6.10 Student declaration checklist

Before submission, the learner should be able to make the following declaration honestly:

- I have read the centre-issued assignment brief.
- I understand the command words I have responded to.
- The work is written by me.
- Any support I received helped me understand or improve, but did not replace my own work.
- I have not copied a full answer from another student, website, tutor or AI system.
- I have not invented evidence, data or references.
- I can explain my main points and recommendations.
- I have recorded sources according to my centre's guidance.
- I understand that final assessment decisions belong to the centre and awarding-body process, not to this toolkit.

學生提交前應該能誠實說：

- 我讀過正式 assignment brief。
- 我知道自己回應的是哪些 command words。
- 這份作業是我自己完成的。
- 別人或 AI 只是幫我理解、檢查或改進，沒有替代我寫作。
- 我沒有抄完整答案。
- 我沒有編造數據或來源。

- 我能解釋自己的主要觀點。
- 我按照 centre 要求記錄來源。

如果其中任何一條不能確定，就不要急著提交。先回到 planning、evidence 或 drafting 階段。

Chapter 7. Self-Check Before Submission

Before submitting a draft, the learner should check the answer in four layers.

7.1 Task check

- Have I answered the exact command word?
- Have I addressed the correct business and customer group?
- Have I followed the centre-issued brief?

先檢查有沒有答題，而不是先檢查英文漂不漂亮。英文再漂亮，如果答錯任務也沒有用。

7.2 Evidence check

- Does each main point have support?
- Is the evidence real, reasonable and relevant?
- Have I avoided invented numbers?
- Have I recorded sources properly?

每個 main point 都應該問一句：我的證據在哪裡？如果證據只是「我覺得」或「大家都知道」，這一段就需要重寫。

7.3 Writing check

- Does each paragraph have one main point?
- Have I explained why the evidence matters?
- Have I applied the point to the business?
- Have I used linking words clearly?

不要把所有想法堆在一段裡。一段處理一個核心 point，然後用 evidence、application 和 judgement 展開。

7.4 Evaluation check

- Have I considered limitations?
- Have I avoided absolute claims?
- Have I explained what success depends on?
- Have I made a reasoned judgement?

Evaluation 不是「最後寫一個缺點」。真正的 evaluation 要說明條件、限制、取捨和判斷依據。

7.5 Submission readiness protocol

Many learners finish an assignment by reading it once and checking spelling. This is not enough. A BTEC Business assignment should be checked in stages. Each stage asks a different question.

Stage	Main question	What to do
Task alignment	Did I answer the exact task?	Compare each section against the brief.
Evidence audit	Is my evidence honest and relevant?	Check source notes, data, examples and assumptions.
Application audit	Have I applied ideas to the business?	Look for named organisation, customer group, problem and decision.
Writing audit	Does each paragraph have a clear function?	Label point, evidence, explanation, application and judgement.
Integrity audit	Can I explain and defend my work?	Check authorship, support log and draft history.
Final presentation	Is the work ready for submission?	Check formatting, file name, references and centre instructions.

The learner should not do all checks at once. If the learner tries to check grammar, evidence, evaluation and formatting in one reading, important problems will be missed. It is better to read the assignment several times, each time with one purpose.

不要只在提交前「通讀一遍」。真正有效的檢查要分層：

1. 先看有沒有答題。
2. 再看 evidence 是否真實、相關。
3. 再看是否 apply to business。
4. 再看 paragraph 是否有結構。
5. 再看 authorship 和 AI 風險。
6. 最後才看格式、拼寫、文件名。

順序很重要。很多學生一開始就改語法，結果最嚴重的問題其實是答偏題。

7.6 Task alignment audit

Task alignment means every major section of the assignment should connect directly to the brief. A learner can use a simple table:

Brief requirement	Where I answered it	Evidence used	Still missing?
Explain the target market	Section 1, paragraph 2	Customer profile from case notes	Need clearer age/income detail
Analyse two promotional methods	Section 2	Social media example; leaflet cost estimate	Need comparison of suitability
Recommend one method	Section 3	Cost, reach and feasibility	Need stronger final judgement

This table is not necessarily submitted. It is a working tool. It helps the learner see whether the assignment is complete before the final draft is sent.

If a requirement has no location in the assignment, the learner has probably missed part of the task. If a section of the assignment cannot be linked back to any requirement, it may be irrelevant.

Task alignment audit 的核心問題是：

- brief 要我做什麼？
- 我在哪一段回答了？
- 我用了什麼證據？
- 還缺什麼？

如果 brief 裡有一項要求，在正文裡找不到對應位置，說明可能漏題。如果正文裡有一大段內容，卻對不上 brief 的任何要求，說明可能寫偏。

7.7 Evidence audit

Evidence audit checks whether the assignment is supported properly. The learner should look at each main claim and ask whether the evidence is strong enough.

Claim in the assignment	Evidence status	Action
The cafe should target students	Partly supported	Add reason from location, price sensitivity or customer behaviour
Social media is low-cost	Needs qualification	Explain that low-cost does not mean no staff time or content cost
Staff training will improve service	Needs evidence	Link to customer complaints, observed errors or service standards
The business will increase profit	Too strong	Change to may improve revenue if customer response is positive

The audit should also separate evidence from assumption.

Evidence:

The business currently receives more weekend orders than weekday orders, according to the case notes.

Assumption:

Students may be price-sensitive because they usually have limited disposable income.

Both can be useful, but they should not be treated the same. Evidence can support a claim more directly. Assumption should be presented cautiously and, where possible, tested.

Evidence audit 不是只看「有沒有引用」。它要看：

- 這個 claim 有沒有證據？
- 證據是否和這個企業有關？
- 這是事實、資料、觀察，還是假設？
- 如果是假設，有沒有用 cautious language？

例如「學生通常預算有限」可以作為 reasonable assumption，但不能寫成已經調查證明的事實，除非真的有 survey 或 case evidence。

7.8 Application audit

Application is the point where many BTEC Business assignments become stronger. A paragraph is applied when the concept is clearly connected to the selected business, scenario, customer group or decision.

Weak application:

Customer service is important because customers like good service.

Stronger application:

Customer service may be important for Harbour Bean Cafe because repeat visits from local students could help stabilise revenue during weekdays when tourist demand is lower.

The stronger version applies the idea to a business situation: local students, repeat visits, weekday revenue and lower tourist demand.

Application test

For each paragraph, ask:

- Could this paragraph apply to any business?
- Have I named the business or scenario?
- Have I identified the relevant customer, staff group, product, cost or problem?
- Have I explained why the point matters for this case?

If a paragraph could be copied into almost any business assignment, it is probably too general.

Application 的檢查方法很簡單：如果這一段把企業名字換掉還能完全成立，那它可能太泛泛而談。

真正的 applied writing 要出現：

- 這家企業的具體問題。
- 這類顧客或員工。
- 具體產品、服務、成本或營運限制。
- 為什麼這個概念對此案例重要。

7.9 Evaluation audit

Evaluation is often the last quality layer. It does not mean adding a negative sentence. It means judging suitability.

An evaluation audit can use four questions:

1. **Suitability:** Is this method appropriate for the business?
2. **Feasibility:** Can the business realistically do it?
3. **Limitations:** What could reduce success?
4. **Conditions:** What must happen for the recommendation to work?

Example:

Social media may be suitable for Harbour Bean Cafe because it is relatively low-cost and can reach local students quickly. However, it may only be effective if the cafe posts consistently and uses content that matches student interests. If the business does not have staff time to manage the account, a

simpler in-store loyalty card may be more realistic.

This is evaluation because it makes a judgement and sets conditions. It does not simply list an advantage and a disadvantage.

Evaluation 可以用四個問題檢查：

- 適合嗎？
- 做得到嗎？
- 有什麼限制？
- 成功取決於什麼條件？

不要只寫 “However, it also has disadvantages.” 這種句子沒有真正判斷。要說清楚是什麼 disadvantage，為什麼重要，會如何影響 decision。

7.10 Final file and version control

Assignment work is not only about writing. The learner must also manage the final file responsibly. A strong assignment can still create problems if the learner uploads the wrong version, loses source notes or ignores centre instructions.

Recommended version naming:

```
UnitName_TaskNumber_StudentName_Draft01  
UnitName_TaskNumber_StudentName_Draft02  
UnitName_TaskNumber_StudentName_Final
```

Before final submission, check:

- Is this the correct final file?
- Does the file name follow centre instructions?
- Are references or source notes included if required?
- Are appendices labelled clearly?
- Are screenshots, charts or tables readable?
- Have I removed planning notes that should not be submitted?
- Have I kept a copy of the submitted version?

很多學生最後的風險來自文件管理：

- 傳錯版本。
- 文件名不符合要求。
- appendix 沒標清。
- 圖片看不清。
- source notes 丟失。
- final version 和 draft 混在一起。

建議每次都保留 final submitted copy。不要只留一個不斷覆蓋的文件。

7.11 Final twenty-minute review

If the learner has only twenty minutes before submission, the order should be:

1. Check the brief requirement.
2. Check missing task parts.
3. Check evidence and source notes.
4. Check whether each section applies to the business.
5. Check evaluation sentences.
6. Check academic integrity and authorship.
7. Check file name and upload instructions.

Do not spend the whole final twenty minutes replacing simple words with difficult words. That usually does not improve the assignment meaningfully. Clarity is more important than decoration.

最後二十分鐘不要忙著把 simple words 換成 fancy words。更重要的是：

- 有沒有漏題？

- 證據是否可靠?
- 有沒有 apply to business?
- evaluation 是否真的有判斷?
- 文件是否正確?

語言要清楚、準確、可解釋。不要為了顯得高級而犧牲 clarity。

7.12 Submission confidence scale

The learner can rate readiness from 1 to 5:

Level	Meaning	What to do
1	I do not understand the task.	Return to brief reading and ask for guidance.
2	I understand the topic but have weak evidence.	Build an evidence plan before rewriting.
3	I have answered the task but writing is mostly descriptive.	Add application, analysis and judgement.
4	I have a structured answer with evidence and application.	Check evaluation, sources and final presentation.
5	I can explain, defend and submit the work responsibly.	Submit according to centre instructions.

The goal is not emotional confidence only. It is evidence-based confidence. The learner should feel ready because the assignment has been checked systematically.

提交信心不是「我覺得差不多了」。真正的 confidence 來自系統檢查:

- 題目讀清楚。
- 證據有記錄。
- 段落有結構。
- 有 application。
- 有 evaluation。
- 能解釋自己的 work。

這樣的信心才可靠。

Part II. Subject Stickers

These subject stickers are quick-reference cards. They connect common BTEC Business topic areas to the same output discipline: task, evidence, application, judgement and integrity.

POSITIONING STICKER

This toolkit is a bilingual output system. The learner reads the brief, maps the evidence, selects the academic function and writes with visible responsibility.

這本書的核心是穩定輸出：讀題、證據、語言、判斷、合規。

Subject Sticker 1. Marketing

SUBJECT FOCUS

Marketing assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is customer group, message, channel, cost and evidence of response.

把 target customer、channel fit、成本和衡量方式放在同一段，不要只寫多宣傳。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: I think this is good.

Stronger route: Evidence suggests that this may be suitable because ...

避免一上來用 I think。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for marketing because The available evidence suggests that ... However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 2. Finance

SUBJECT FOCUS

Finance assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is cash-flow pressure, break-even logic, cost control and repayment risk.

看到 finance 題，先問現金流、成本、償還能力和風險，不要只寫 profit。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: This will definitely increase sales.

Stronger route: This could increase sales if the target customers respond to ...

避免 definitely / surely。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for finance because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 3. Human Resources

SUBJECT FOCUS

Human Resources assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is staffing issue, recruitment method, training need and motivation.

先診斷問題類型，再選 recruitment、training、motivation 或 performance management。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: Many people like it.

Stronger route: The target customer group may respond positively if evidence shows ...

many people 太空泛。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for human resources because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 4. Enterprise

SUBJECT FOCUS

Enterprise assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is business opportunity, uncertainty, risk response and resource fit.

entrepreneurship 題要把 opportunity 和 risk 一起寫，不能只寫創業很有前景。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: The business should advertise more.

Stronger route: The business should use a more targeted promotional method to reach ...

advertise more 沒有策略含量。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for enterprise because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 5. Customer Service

SUBJECT FOCUS

Customer Service assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is customer journey, complaint pattern, retention and reputation.

customer service 要連到 repeat purchase、complaints、brand reputation 和服務流程。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: There are advantages and disadvantages.

Stronger route: The main trade-off is between ... and ...

優缺點清單不是 evaluation。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for customer service because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 6. Operations

SUBJECT FOCUS

Operations assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is capacity, quality, process efficiency, bottleneck and cost.

operations 題要寫流程、品質、容量和瓶頸，不要流水帳描述工作步驟。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: The company needs better staff.

Stronger route: The staffing issue appears to relate to ..., so a suitable response may be ...

避免責怪員工，先診斷。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for operations because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 7. Business Environment

SUBJECT FOCUS

Business Environment assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is PESTLE pressure, stakeholder effect and organisational response.

PESTLE 要選最相關的因素，說清它如何改變企業決策。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: The business needs more money.

Stronger route: The finance issue should be assessed through cash flow, cost and repayment risk.

finance 段落要有判斷框架。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for business environment because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 8. International Business

SUBJECT FOCUS

International Business assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is market entry, cultural difference, logistics, currency and legal risk.

international 題要謹慎，避免一口氣說全球化一定好。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: Social media is cheap and effective.

Stronger route: Social media may be low-cost, but its effectiveness depends on content quality and audience response.

低成本不等於有效。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for international business because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 9. Retail Business

SUBJECT FOCUS

Retail Business assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is footfall, product range, location, display and customer behaviour.

retail 題常要把 location、customer behaviour 和 sales evidence 串起來。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: Customers are important.

Stronger route: Customer retention matters because repeat purchases can affect ...

常識句要轉成 business implication。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for retail business because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 10. Digital Business

SUBJECT FOCUS

Digital Business assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is online channel, conversion, data tracking and customer trust.

digital 題要說 metric, 例如 reach、clicks、conversion、repeat purchase。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: The business should expand internationally.

Stronger route: International expansion may be suitable only if the business can manage ...

international 題要寫風險。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for digital business because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 11. Hospitality Business

SUBJECT FOCUS

Hospitality Business assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is service consistency, occupancy, seasonal demand and reviews.

hospitality 題要注意 seasonality、review score 和服務標準。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: I think this is good.

Stronger route: Evidence suggests that this may be suitable because ...

避免一上來用 I think。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for hospitality business because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Subject Sticker 12. Small Business

SUBJECT FOCUS

Small Business assignments usually test whether the learner can connect concepts to a specific business situation. The useful writing focus is limited budget, owner time, local market and simple evidence.

小企業題不能套大型企業答案，重點是 low-cost、manageable、measurable。

MINI EVIDENCE MAP

- What is the business problem?
- What evidence is available?
- Which customer, cost, staff or operational group is affected?
- What decision must the business make?

避諱

Weak line: This will definitely increase sales.

Stronger route: This could increase sales if the target customers respond to ...

避免 definitely / surely。

ACADEMIC PHRASE SET

The main issue appears to be ... because This matters for small business because The available evidence suggests that However, this recommendation may be limited by Therefore, the business should prioritise ... provided that

Part III. Academic Writing Phrasebook

The phrasebook is organised as one master set plus topic riders. Learners should choose the academic function first, then adapt the phrase to the actual assignment brief and evidence.

PHRASEBOOK BOUNDARY

Phrases are practice scaffolds. They should be rewritten in the learner's own voice before submission and must be connected to real brief evidence.

套語只用於練習 academic function。提交前必須改成學生自己的語氣，並接上真實 evidence。

Master phrasebook by academic function

INTRODUCE A POINT

This section argues that ...

用於段落開頭，讓讀者知道本段功能。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

APPLY TO A BUSINESS

In this business context, this matters because ...

把概念放回案例，不讓段落像背書。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

USE EVIDENCE CAUTIOUSLY

The available evidence suggests that ...

證據有限時使用，避免過度宣稱。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

SHOW LIMITATION

This recommendation may be limited by ...

用於 Merit/Distinction 層次的限制分析。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

COMPARE OPTIONS

Compared with ..., this option may be more suitable because ...

比較兩個方案時避免只列優缺點。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

MAKE JUDGEMENT

Overall, the most suitable option appears to be ..., provided that ...

結論句要有條件，不要絕對化。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

AVOID OVERCLAIMING

This may improve ..., but the result depends on ...

處理不確定性和條件。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

CONNECT EVIDENCE

This evidence is relevant because ...

讓引用或數據真正服務於論點。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

REPAIR WEAK EVIDENCE

If this data is unavailable, the learner should use ...

面對缺數據時保持誠實。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

CLOSE A PARAGRAPH

Therefore, this point supports the recommendation because ...

把段落拉回 task。

Adaptation rule: replace every blank with the learner's own brief, business context and evidence.

Topic rider 1. Marketing

TOPIC-SPECIFIC APPLICATION

The proposed channel is suitable only if the target group actually uses it and the business can monitor response.

Evidence route: channel fit, target segment, campaign cost, response evidence.

Practice line: In this marketing task, the most relevant evidence is _____ because _____.

Topic rider 2. Finance

TOPIC-SPECIFIC APPLICATION

The finance decision should be judged through cash flow, affordability and repayment risk rather than profit alone.

Evidence route: cash flow, break-even, fixed cost, repayment risk.

Practice line: In this finance task, the most relevant evidence is _____ because _____.

Topic rider 3. Human Resources

TOPIC-SPECIFIC APPLICATION

The staffing response should match the diagnosed issue: skill gap, motivation problem, workload pressure or recruitment need.

Evidence route: skills audit, staff feedback, turnover pattern, training cost.

Practice line: In this human resources task, the most relevant evidence is _____ because _____.

Topic rider 4. Operations

TOPIC-SPECIFIC APPLICATION

The operational recommendation should show how the process, bottleneck or quality issue affects business performance.

Evidence route: capacity, delay, waste, quality defect, cost impact.

Practice line: In this operations task, the most relevant evidence is _____ because _____.

Topic rider 5. Customer Service

TOPIC-SPECIFIC APPLICATION

The service issue matters when it affects complaints, repeat purchase, reputation or customer trust.

Evidence route: complaint log, review evidence, retention, service recovery.

Practice line: In this customer service task, the most relevant evidence is _____ because _____.

Topic rider 6. Enterprise

TOPIC-SPECIFIC APPLICATION

The opportunity should be judged against risk, resources and the learner's evidence of customer demand.

Evidence route: market need, resource fit, uncertainty, risk response.

Practice line: In this enterprise task, the most relevant evidence is _____ because _____.

Topic rider 7. Business Environment

TOPIC-SPECIFIC APPLICATION

The external factor should be selected for relevance rather than listed as a full PESTLE table.

Evidence route: legal change, economic pressure, social trend, stakeholder effect.

Practice line: In this business environment task, the most relevant evidence is _____ because _____.

Topic rider 8. International Business

TOPIC-SPECIFIC APPLICATION

International expansion should be treated as conditional on logistics, culture, currency and legal requirements.

Evidence route: market entry, exchange rate, cultural fit, compliance risk.

Practice line: In this international business task, the most relevant evidence is _____ because _____.

Topic rider 9. Retail

TOPIC-SPECIFIC APPLICATION

The retail judgement should connect location, product range and customer behaviour to sales evidence.

Evidence route: footfall, product mix, display, local competition.

Practice line: In this retail task, the most relevant evidence is _____ because _____.

Topic rider 10. Digital Business

TOPIC-SPECIFIC APPLICATION

Digital activity should be judged by conversion, trust and repeat behaviour, not by reach alone.

Evidence route: reach, clicks, conversion, review trust, data privacy.

Practice line: In this digital business task, the most relevant evidence is _____ because _____.

Topic rider 11. Hospitality

TOPIC-SPECIFIC APPLICATION

Hospitality evidence should connect service consistency, occupancy, seasonality and guest feedback.

Evidence route: occupancy, review score, peak demand, staffing rota.

Practice line: In this hospitality task, the most relevant evidence is _____ because _____.

Topic rider 12. Small Business

TOPIC-SPECIFIC APPLICATION

Small-business recommendations should stay affordable, manageable and measurable for the owner.

Evidence route: owner time, local demand, low-cost action, simple metric.

Practice line: In this small business task, the most relevant evidence is _____ because _____.

Topic rider 13. Comparison

TOPIC-SPECIFIC APPLICATION

A comparison should judge both options against the same criterion.

Evidence route: cost, speed, suitability, risk, evidence quality.

Practice line: In this comparison task, the most relevant evidence is _____ because _____.

Topic rider 14. Evaluation

TOPIC-SPECIFIC APPLICATION

Evaluation should explain which condition could change the recommendation.

Evidence route: limitation, assumption, trade-off, final judgement.

Practice line: In this evaluation task, the most relevant evidence is _____ because _____.

Part IV. Avoidance Booklet

This small booklet records expressions that usually weaken assignment writing. It is designed for checking a draft before submission.

Avoidance Set 1. overclaiming

Risk focus: absolute success claims. 把絕對語氣改成 conditional judgement。

避諱: **THIS WILL DEFINITELY INCREASE SALES.**

Use instead: This could increase sales if the target group responds to the offer.

Rewrite practice for overclaiming: _____

避諱: **THE CAMPAIGN WILL BE SUCCESSFUL.**

Use instead: The campaign may be suitable if the channel reaches the selected customers.

Rewrite practice for overclaiming: _____

避諱: **THIS IS THE BEST METHOD.**

Use instead: This appears to be the most suitable method given the available evidence.

Rewrite practice for overclaiming: _____

避諱: **THE BUSINESS WILL MAKE MORE PROFIT.**

Use instead: Profit may improve if additional revenue is higher than campaign cost.

Rewrite practice for overclaiming: _____

避諱: **CUSTOMERS WILL LIKE IT.**

Use instead: Customers may respond positively if the offer matches their needs.

Rewrite practice for overclaiming: _____

Avoidance Set 2. vague customers

Risk focus: unclear target groups. 把 customers 拆成具體人群。

避諱: **MANY PEOPLE LIKE CHEAP PRODUCTS.**

Use instead: Price-sensitive students may respond to lower-cost offers.

Rewrite practice for vague customers: _____

避諱: **CUSTOMERS ARE IMPORTANT.**

Use instead: Repeat customers matter because they can reduce the need for constant new-customer acquisition.

Rewrite practice for vague customers: _____

避諱： EVERYONE USES SOCIAL MEDIA.

Use instead: The selected audience is likely to use short-form video if evidence shows mobile-first behaviour.

Rewrite practice for vague customers: _____

避諱： PEOPLE WANT GOOD SERVICE.

Use instead: Customers who complain about waiting time may value faster response and clearer communication.

Rewrite practice for vague customers: _____

避諱： THE BUSINESS SHOULD ATTRACT MORE PEOPLE.

Use instead: The business should target a defined group whose needs match the offer.

Rewrite practice for vague customers: _____

Avoidance Set 3. empty recommendations

Risk focus: advice without evidence. 建議後面必須跟證據和條件。

避諱： THE BUSINESS SHOULD IMPROVE MARKETING.

Use instead: The business should test a specific channel because the target group is likely to see it.

Rewrite practice for empty recommendations: _____

避諱： THE COMPANY SHOULD TRAIN STAFF.

Use instead: Training is suitable if the evidence shows a skills gap rather than a motivation issue.

Rewrite practice for empty recommendations: _____

避諱： THE BUSINESS NEEDS BETTER SERVICE.

Use instead: Service recovery should focus on the complaint stage where most dissatisfaction occurs.

Rewrite practice for empty recommendations: _____

避諱： THE BUSINESS SHOULD EXPAND.

Use instead: Expansion should be considered only if demand evidence and cash-flow capacity support it.

Rewrite practice for empty recommendations: _____

避諱： THE BUSINESS SHOULD USE TECHNOLOGY.

Use instead: Technology is useful only if it solves the identified process or customer problem.

Rewrite practice for empty recommendations: _____

Avoidance Set 4. weak finance writing

Risk focus: profit talk without cash-flow logic. 財務不能只寫賺錢。

避諱: **MORE SALES MEANS MORE PROFIT.**

Use instead: Higher sales may still reduce profit if variable costs and promotion costs are too high.

Rewrite practice for weak finance writing: _____

避諱: **THE BUSINESS NEEDS MORE MONEY.**

Use instead: The finance issue should be assessed through cash flow, cost and repayment risk.

Rewrite practice for weak finance writing: _____

避諱: **THE LOAN IS GOOD BECAUSE IT GIVES CASH.**

Use instead: A loan improves short-term cash but creates repayment pressure.

Rewrite practice for weak finance writing: _____

避諱: **DISCOUNTS WILL HELP REVENUE.**

Use instead: Discounts may increase volume but lower contribution per sale.

Rewrite practice for weak finance writing: _____

避諱: **EXPANSION IS AFFORDABLE.**

Use instead: Affordability depends on cash inflows, fixed costs and the timing of payments.

Rewrite practice for weak finance writing: _____

Avoidance Set 5. weak marketing writing

Risk focus: promotion talk without channel fit. 宣傳要有渠道和受眾。

避諱: **SOCIAL MEDIA IS CHEAP AND EFFECTIVE.**

Use instead: Social media may be low-cost, but effectiveness depends on content quality and audience response.

Rewrite practice for weak marketing writing: _____

避諱: **THE BUSINESS SHOULD ADVERTISE MORE.**

Use instead: The business should choose a channel that reaches the target segment at an affordable cost.

Rewrite practice for weak marketing writing: _____

避諱: **A DISCOUNT WILL ATTRACT CUSTOMERS.**

Use instead: A discount may attract price-sensitive customers but can weaken margin and brand perception.

Rewrite practice for weak marketing writing: _____

避諱: **POSTERS ARE USEFUL.**

Use instead: Posters are useful only if placed where the target customer is likely to notice them.

Rewrite practice for weak marketing writing: _____

避諱: **INFLUENCERS WILL INCREASE AWARENESS.**

Use instead: Influencer activity may increase awareness if the audience matches the product market.

Rewrite practice for weak marketing writing: _____

Avoidance Set 6. weak HR writing

Risk focus: blaming staff instead of diagnosing the issue. 不要責怪員工，要分析制度或能力問題。

避諱: **THE COMPANY NEEDS BETTER STAFF.**

Use instead: The staffing issue appears to relate to skills, workload or motivation.

Rewrite practice for weak HR writing: _____

避諱: **TRAINING WILL FIX THE PROBLEM.**

Use instead: Training is suitable only if employees lack knowledge or procedure confidence.

Rewrite practice for weak HR writing: _____

避諱: **STAFF ARE LAZY.**

Use instead: Low performance may reflect unclear targets, workload pressure or weak supervision.

Rewrite practice for weak HR writing: _____

避諱: **THE BUSINESS SHOULD HIRE MORE WORKERS.**

Use instead: Recruitment is suitable if workload evidence shows capacity shortage.

Rewrite practice for weak HR writing: _____

避諱: **MOTIVATION IS LOW.**

Use instead: Motivation should be evidenced through turnover, absence, feedback or performance patterns.

Rewrite practice for weak HR writing: _____

Avoidance Set 7. weak operations writing

Risk focus: process description without bottleneck analysis. 流程描述要升級為瓶頸判斷。

避諱: **THE PROCESS IS SLOW.**

Use instead: The delay appears to occur at the order-processing stage.

Rewrite practice for weak operations writing: _____

避諱: **QUALITY IS IMPORTANT.**

Use instead: Quality matters because defects can increase returns, cost and reputational risk.

Rewrite practice for weak operations writing: _____

避諱: **THE BUSINESS SHOULD BE MORE EFFICIENT.**

Use instead: Efficiency can improve if the identified bottleneck is reduced.

Rewrite practice for weak operations writing: _____

避諱: **MORE MACHINES WILL HELP.**

Use instead: Additional equipment is suitable only if capacity is the real constraint.

Rewrite practice for weak operations writing: _____

避諱: **THE BUSINESS WASTES TIME.**

Use instead: The paragraph should identify which task creates wasted time and how it affects output.

Rewrite practice for weak operations writing: _____

Avoidance Set 8. weak customer service writing

Risk focus: service praise without retention logic. 服務要連到投訴、復購和聲譽。

避諱: **GOOD SERVICE IS IMPORTANT.**

Use instead: Service quality matters when it affects repeat purchase and complaints.

Rewrite practice for weak customer service writing: _____

避諱: **CUSTOMERS WANT FAST REPLIES.**

Use instead: Response time should be linked to complaint resolution and customer trust.

Rewrite practice for weak customer service writing: _____

避諱: **THE BUSINESS SHOULD BE FRIENDLY.**

Use instead: Staff communication may improve satisfaction if complaints show confusion or frustration.

Rewrite practice for weak customer service writing: _____

避諱: **BAD REVIEWS ARE BAD.**

Use instead: Negative reviews can reduce trust and make new-customer acquisition harder.

Rewrite practice for weak customer service writing: _____

避諱: **THE CUSTOMER IS ALWAYS RIGHT.**

Use instead: Service recovery should balance customer satisfaction with cost and policy limits.

Rewrite practice for weak customer service writing: _____

Avoidance Set 9. AI and authorship risk

Risk focus: language that no longer sounds learner-owned. AI 只能支持，不能替代學生輸出。

避諱: **AI WROTE THIS PARAGRAPH FOR CLARITY.**

Use instead: AI may be used to check structure, but the learner must rewrite and own the argument.

Rewrite practice for AI and authorship risk: _____

避諱: **THE WORDING SOUNDS PROFESSIONAL.**

Use instead: The learner must still be able to explain each claim, source and recommendation.

Rewrite practice for AI and authorship risk: _____

避諱: **I USED AI FOR THE FINAL ANSWER.**

Use instead: AI use should follow the centre's policy and be recorded in the support log.

Rewrite practice for AI and authorship risk: _____

避諱: **THE SOURCE LOOKS REAL.**

Use instead: Every source must be traceable and checked before use.

Rewrite practice for AI and authorship risk: _____

避諱: **THE PARAGRAPH IS BETTER NOW.**

Use instead: Improvement is safe only if the learner's own reasoning remains visible.

Rewrite practice for AI and authorship risk: _____

Avoidance Set 10. source misuse

Risk focus: evidence dropped in without explanation. 引用後必須解釋它證明什麼。

避諱: **ACCORDING TO A WEBSITE, MARKETING IS USEFUL.**

Use instead: Use the source to support a specific claim about the selected business.

Rewrite practice for source misuse: _____

避諱: **THIS STATISTIC PROVES THE METHOD WORKS.**

Use instead: Explain what the statistic can and cannot prove.

Rewrite practice for source misuse: _____

避諱: **THE SOURCE SAYS CUSTOMERS LIKE IT.**

Use instead: Identify which customers, which context and why it matters.

Rewrite practice for source misuse: _____

避諱: **I FOUND A QUOTE.**

Use instead: A quote needs interpretation, not decoration.

Rewrite practice for source misuse: _____

避諱: **THE EVIDENCE IS ENOUGH.**

Use instead: Evidence is enough only if it matches the task object and paragraph claim.

Rewrite practice for source misuse: _____

Avoidance Set 11. false evaluation

Risk focus: advantages/disadvantages lists without judgement. 優缺點清單不是評估。

避諱: **THERE ARE ADVANTAGES AND DISADVANTAGES.**

Use instead: The main trade-off is between cost and speed.

Rewrite practice for false evaluation: _____

避諱: **HOWEVER, THERE ARE PROBLEMS.**

Use instead: The limitation matters because it may reduce suitability for this business.

Rewrite practice for false evaluation: _____

避諱: **BOTH OPTIONS ARE GOOD.**

Use instead: Option A is more suitable if the business prioritises cost control.

Rewrite practice for false evaluation: _____

避諱: **IT DEPENDS.**

Use instead: It depends on budget, staff capacity and target-customer response.

Rewrite practice for false evaluation: _____

避諱: **THIS IS A BALANCED ANSWER.**

Use instead: A balanced answer still needs a final justified judgement.

Rewrite practice for false evaluation: _____

Avoidance Set 12. final submission risk

Risk focus: unchecked file, missing brief alignment and unsupported claims. 提交前檢查任務、文件和證據鏈。

避諱: **THE ASSIGNMENT IS FINISHED.**

Use instead: The final draft should be checked against the brief, evidence and file requirements.

Rewrite practice for final submission risk: _____

避諱: **THE FILE IS UPLOADED.**

Use instead: Check file name, version, unit, task number and submission format.

Rewrite practice for final submission risk: _____

避諱: **THE WRITING SOUNDS GOOD.**

Use instead: Check whether each paragraph answers the command word.

Rewrite practice for final submission risk: _____

避諱: **REFERENCES ARE INCLUDED.**

Use instead: Check whether each reference is used honestly and explained.

Rewrite practice for final submission risk: _____

避諱: **THE TUTOR CHECKED IT.**

Use instead: Tutor feedback supports revision but does not replace learner ownership.

Rewrite practice for final submission risk: _____

Part V. Mini Templates

The following templates are small, repeatable writing tools. These templates are practice scaffolds, not submission-ready answers. Replace every field with the learner's own brief, evidence and business case.

Template Pack 1. a small cafe choosing a low-cost promotional method

Use these templates with this sample context: a small cafe choosing a low-cost promotional method. These templates are practice scaffolds, not submission-ready answers. Replace every field with the learner's own brief and evidence before writing.

BRIEF-TO-PARAGRAPH TEMPLATE

Part VI. Tiny Review Booklets

These twenty compact review cards are designed for tutors or learners. Each card has a distinct review function. They are intended to be used after drafting one paragraph, not as filler pages.

Tiny Booklet 1. Task alignment

BOOKLET USE

Use this page after writing one draft paragraph for Brief reading. Review move: completion. Evidence route: assignment brief, command word, assessment criterion. Key question: Does the paragraph answer the exact command word?

寫完一段後使用。本頁重點是：Circle the command word and underline the sentence that answers it.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Brief reading?
- Evidence: which assignment brief, command word, assessment criterion supports the claim?
- Depth: is the paragraph at completion level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: TASK DRIFT

- Weak line to avoid: The paragraph explains the topic but not the task.
- Repair route: The paragraph should answer the command word and task object directly.
- Second risk: This is related to business.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 2. Evidence trail

BOOKLET USE

Use this page after writing one draft paragraph for Evidence planning. Review move: application. Evidence route: source log, date, brief evidence, case data. Key question: Can the evidence be traced and explained?

寫完一段後使用。本頁重點是：Add source, date and the sentence explaining relevance.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Evidence planning?
- Evidence: which source log, date, brief evidence, case data supports the claim?
- Depth: is the paragraph at application level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: SOURCE MISUSE

- Weak line to avoid: I found a quote.
- Repair route: A quote needs interpretation, not decoration.
- Second risk: The evidence is enough.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 3. Business application

BOOKLET USE

Use this page after writing one draft paragraph for Business context. Review move: analysis. Evidence route: business name, customer group, cost, staff or process affected. Key question: Is the point connected to the selected business?

寫完一段後使用。本頁重點是：Name the business, customer group, cost or process affected.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Business context?
- Evidence: which business name, customer group, cost, staff or process affected supports the claim?
- Depth: is the paragraph at analysis level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: APPLICATION DRIFT

- Weak line to avoid: This applies to many businesses.
- Repair route: The paragraph should show why it applies to this business.
- Second risk: The business should do this.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 4. Cautious language

BOOKLET USE

Use this page after writing one draft paragraph for Academic phrasing. Review move: evaluation. Evidence route: conditional language, limits, uncertainty and evidence strength. Key question: Is the claim too absolute?

寫完一段後使用。本頁重點是：Replace will definitely with may, could, is likely to, or depends on.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Academic phrasing?
- Evidence: which conditional language, limits, uncertainty and evidence strength supports the claim?
- Depth: is the paragraph at evaluation level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: OVERCLAIMING

- Weak line to avoid: This will definitely increase sales.
- Repair route: This could increase sales if the target group responds to the offer.
- Second risk: The business will make more profit.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 5. Customer group

BOOKLET USE

Use this page after writing one draft paragraph for Marketing. Review move: final audit. Evidence route: target segment, customer need, channel fit and response evidence. Key question: Is the target customer specific enough?

寫完一段後使用。本頁重點是：Replace customers with a defined segment and reason.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Marketing?
- Evidence: which target segment, customer need, channel fit and response evidence supports the claim?
- Depth: is the paragraph at final audit level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: VAGUE CUSTOMERS

- Weak line to avoid: Customers are important.
- Repair route: Repeat customers matter because they can reduce the need for constant new-customer acquisition.
- Second risk: The business should attract more people.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 6. Finance logic

BOOKLET USE

Use this page after writing one draft paragraph for Finance. Review move: completion. Evidence route: cash flow, fixed cost, variable cost, break-even and repayment risk. Key question: Does the paragraph mention cost, cash flow or risk?

寫完一段後使用。本頁重點是：Add one finance implication before the judgement.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Finance?
- Evidence: which cash flow, fixed cost, variable cost, break-even and repayment risk supports the claim?
- Depth: is the paragraph at completion level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: WEAK FINANCE WRITING

- Weak line to avoid: More sales means more profit.
- Repair route: Higher sales may still reduce profit if variable costs and promotion costs are too high.
- Second risk: The loan is good because it gives cash.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 7. Marketing logic

BOOKLET USE

Use this page after writing one draft paragraph for Marketing. Review move: application. Evidence route: channel choice, target customer, campaign cost and measurable response. Key question: Does the channel fit the audience?

寫完一段後使用。本頁重點是：Explain why this channel reaches this group.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Marketing?
- Evidence: which channel choice, target customer, campaign cost and measurable response supports the claim?
- Depth: is the paragraph at application level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: WEAK MARKETING WRITING

- Weak line to avoid: Social media is cheap and effective.
- Repair route: Social media may be low-cost, but effectiveness depends on content quality and audience response.
- Second risk: The business should advertise more.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 8. HR diagnosis

BOOKLET USE

Use this page after writing one draft paragraph for Human Resources. Review move: analysis. Evidence route: skills gap, motivation issue, workload pressure or recruitment need. Key question: Is the staff issue diagnosed before the solution?

寫完一段後使用。本頁重點是：Name whether the problem is skill, motivation, workload or recruitment.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Human Resources?
- Evidence: which skills gap, motivation issue, workload pressure or recruitment need supports the claim?
- Depth: is the paragraph at analysis level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: WEAK HR WRITING

- Weak line to avoid: The company needs better staff.
- Repair route: The staffing issue appears to relate to skills, workload or motivation.
- Second risk: Training will fix the problem.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 9. Operations bottleneck

BOOKLET USE

Use this page after writing one draft paragraph for Operations. Review move: evaluation. Evidence route: capacity, quality, delay, waste and process constraint. Key question: Does the paragraph identify a process problem?

寫完一段後使用。本頁重點是：Add capacity, quality, delay or waste evidence.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Operations?
- Evidence: which capacity, quality, delay, waste and process constraint supports the claim?
- Depth: is the paragraph at evaluation level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: WEAK OPERATIONS WRITING

- Weak line to avoid: The process is slow.
- Repair route: The delay appears to occur at the order-processing stage.
- Second risk: The business should be more efficient.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 10. Customer service

BOOKLET USE

Use this page after writing one draft paragraph for Customer Service. Review move: final audit. Evidence route: complaint pattern, response time, retention and reputation. Key question: Does the service point connect to retention or reputation?

寫完一段後使用。本頁重點是：Add a business consequence, not just service praise.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Customer Service?
- Evidence: which complaint pattern, response time, retention and reputation supports the claim?
- Depth: is the paragraph at final audit level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: WEAK CUSTOMER SERVICE WRITING

- Weak line to avoid: Good service is important.
- Repair route: Service quality matters when it affects repeat purchase and complaints.
- Second risk: Bad reviews are bad.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 11. Evaluation

BOOKLET USE

Use this page after writing one draft paragraph for Evaluation. Review move: completion. Evidence route: trade-off, limitation, assumption and justified final judgement. Key question: Is there a real trade-off?

寫完一段後使用。本頁重點是：Add one condition that could change the recommendation.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Evaluation?
- Evidence: which trade-off, limitation, assumption and justified final judgement supports the claim?
- Depth: is the paragraph at completion level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: FALSE EVALUATION

- Weak line to avoid: There are advantages and disadvantages.
- Repair route: The main trade-off is between cost and speed.
- Second risk: This is a balanced answer.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 12. Comparison

BOOKLET USE

Use this page after writing one draft paragraph for Comparison. Review move: application. Evidence route: same criterion, option A, option B, suitability and risk. Key question: Are two options judged against the same criterion?

寫完一段後使用。本頁重點是： Use cost, suitability, speed or risk as the comparison basis.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Comparison?
- Evidence: which same criterion, option A, option B, suitability and risk supports the claim?
- Depth: is the paragraph at application level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: COMPARISON DRIFT

- Weak line to avoid: Both options are good.
- Repair route: Option A is more suitable if the business prioritises cost control.
- Second risk: It depends.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 13. AI support log

BOOKLET USE

Use this page after writing one draft paragraph for Academic integrity. Review move: analysis. Evidence route: tool used, purpose, learner rewrite and centre policy. Key question: Can the learner explain what support was used?

寫完一段後使用。本頁重點是： Record what was checked and what was rewritten by the learner.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Academic integrity?
- Evidence: which tool used, purpose, learner rewrite and centre policy supports the claim?
- Depth: is the paragraph at analysis level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: AI AND AUTHORSHIP RISK

- Weak line to avoid: AI wrote this paragraph for clarity.
- Repair route: AI may be used to check structure, but the learner must rewrite and own the argument.
- Second risk: I used AI for the final answer.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 14. Source hierarchy

BOOKLET USE

Use this page after writing one draft paragraph for Evidence quality. Review move: evaluation. Evidence route: official brief, class material, credible source and case evidence. Key question: Is the strongest available evidence being used?

寫完一段後使用。本頁重點是： Replace a weak web claim with brief data, case evidence or a credible source.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Evidence quality?
- Evidence: which official brief, class material, credible source and case evidence supports the claim?
- Depth: is the paragraph at evaluation level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: SOURCE MISUSE

- Weak line to avoid: According to a website, marketing is useful.
- Repair route: Use the source to support a specific claim about the selected business.
- Second risk: This statistic proves the method works.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 15. Final file control

BOOKLET USE

Use this page after writing one draft paragraph for Submission readiness. Review move: final audit. Evidence route: file name, unit, task number, final version and upload format. Key question: Is the final version clearly named?

寫完一段後使用。本頁重點是：Check file name, unit, task number and final upload version.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Submission readiness?
- Evidence: which file name, unit, task number, final version and upload format supports the claim?
- Depth: is the paragraph at final audit level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: FINAL SUBMISSION RISK

- Weak line to avoid: The file is uploaded.
- Repair route: Check file name, version, unit, task number and submission format.
- Second risk: The assignment is finished.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 16. Teacher feedback

BOOKLET USE

Use this page after writing one draft paragraph for Revision. Review move: completion. Evidence route: feedback point, paragraph location, revision action and evidence added. Key question: Has feedback been converted into an action?

寫完一段後使用。本頁重點是：Write the exact revision action, not just 'improve analysis'.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Revision?
- Evidence: which feedback point, paragraph location, revision action and evidence added supports the claim?
- Depth: is the paragraph at completion level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: FEEDBACK-TO-ACTION GAP

- Weak line to avoid: My tutor said improve analysis.
- Repair route: The learner should identify which claim needs more evidence or judgement.
- Second risk: I fixed the paragraph.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 17. Paragraph order

BOOKLET USE

Use this page after writing one draft paragraph for Paragraph structure. Review move: application. Evidence route: claim, evidence, application, analysis and link back to task. Key question: Does evidence appear before judgement?

寫完一段後使用。本頁重點是：Move judgement after evidence and application.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Paragraph structure?
- Evidence: which claim, evidence, application, analysis and link back to task supports the claim?
- Depth: is the paragraph at application level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: PARAGRAPH ORDER RISK

- Weak line to avoid: Therefore this is the best option.
- Repair route: First explain the evidence and application before making the judgement.
- Second risk: The paragraph has many ideas.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 18. Academic phrasing

BOOKLET USE

Use this page after writing one draft paragraph for Academic style. Review move: analysis. Evidence route: precise verb, cautious claim, business implication and task link. Key question: Does the sentence sound too conversational?

寫完一段後使用。本頁重點是： Replace good/bad/very important with a precise academic function.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Academic style?
- Evidence: which precise verb, cautious claim, business implication and task link supports the claim?
- Depth: is the paragraph at analysis level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: CONVERSATIONAL PHRASING

- Weak line to avoid: This is good for the business.
- Repair route: This may support customer retention by ...
- Second risk: The company should do lots of marketing.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 19. Integrity boundary

BOOKLET USE

Use this page after writing one draft paragraph for Academic integrity. Review move: evaluation. Evidence route: traceable evidence, no invented numbers, no copied model answer. Key question: Could any sentence look invented or copied?

寫完一段後使用。本頁重點是： Remove unsupported numbers and generic model-answer language.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to Academic integrity?
- Evidence: which traceable evidence, no invented numbers, no copied model answer supports the claim?
- Depth: is the paragraph at evaluation level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: INTEGRITY BOUNDARY RISK

- Weak line to avoid: The survey shows 85% of customers agree.
- Repair route: Use this only if the survey genuinely exists and is referenced.
- Second risk: This paragraph sounds like a model answer.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Tiny Booklet 20. Progression value

BOOKLET USE

Use this page after writing one draft paragraph for University-readiness. Review move: final audit. Evidence route: independent evidence use, judgement, responsibility and reflection. Key question: Does this paragraph build skills useful for university study?

寫完一段後使用。本頁重點是： Link the habit to evidence, independence and academic judgement.

PARAGRAPH AUDIT

- Claim: what does this paragraph actually say?
- Application: which sentence connects it to University-readiness?
- Evidence: which independent evidence use, judgement, responsibility and reflection supports the claim?
- Depth: is the paragraph at final audit level?
- Revision: what one sentence should be changed first?

避諱 CHECKLIST: PROGRESSION-VALUE GAP

- Weak line to avoid: This helps me pass.
- Repair route: This habit supports independent academic writing beyond this assignment.
- Second risk: I followed the template.
- No invented numbers, fake survey data or copied model paragraph.
- Final test: can the learner explain the paragraph aloud?

Appendix A. Quick Phrase Bank

This phrase bank is not a collection of sentences to paste into an assignment. It is a bank of academic functions. The learner should choose a phrase only when the phrase matches the paragraph function and the learner has their own business evidence.

Evidence and application

- Evidence suggests that ...
- This may be relevant because ...
- In the context of this business, ...
- This is particularly important for ...
- This example indicates that ...
- The available information indicates that ...
- This can be linked to the business because ...
- For this customer group, the evidence may suggest ...
- The case information is useful because it shows ...
- This point is more relevant to this organisation than to a generic business because ...

Recommendation

- One suitable option may be ...
- This recommendation is appropriate because ...
- Compared with ..., this option may be more realistic because ...
- For a small business, this method may be practical because ...
- The business should consider this option if ...
- A more cautious recommendation would be ...
- The first priority should be ...
- This option may be more suitable in the short term because ...
- In the longer term, the business may need to ...

Evaluation

- However, this depends on ...
- The main limitation is ...
- This option may be less effective if ...
- The success of this recommendation should be judged by ...
- Overall, the most suitable option appears to be ..., provided that ...
- This judgement should be treated cautiously because ...
- The recommendation is stronger if ...
- The main trade-off is between ... and ...
- This may solve one problem but create another issue, such as ...
- A final decision should consider ...

Comparison and contrast

- Compared with ..., this option may ...
- In contrast, ... may be more suitable when ...
- The main difference is that ...
- Both methods could support the business, but ...
- While ... focuses on ..., ... is more relevant to ...

Cause and effect

- This may lead to ...
- As a result, the business could ...
- This could affect the business by ...
- The likely consequence is ...
- If this problem continues, the business may ...

Cautious academic language

- may
- could
- is likely to
- appears to
- may be suitable
- may be less effective
- depends on
- provided that
- should be treated as an assumption
- the available evidence suggests

我覺得這個方法最好	I think this is the best.	This option may be the most suitable because...
這個一定會成功	This will succeed.	This may be effective if...
很多人都喜歡	Many people like it.	The target customer group may respond positively if evidence shows...
這個有好處也有壞處	It has advantages and disadvantages.	The main trade-off is between...
公司應該多宣傳	The business should advertise more.	The business could use a more targeted promotional method to...

學習支架

這些 phrase 用來幫學生擺脫口語化和中文直譯。每一句都必須接自己的 business evidence 和 judgement。

Appendix B. Assignment Brief Breakdown Sheet

Use this sheet before writing. It helps the learner convert the brief into a writing plan.

Question	Learner notes
What is the unit or topic area?	
What is the exact task title or task number?	
What command word is used?	
What does the command word require?	
What is the task object?	
Which business, scenario or organisation is involved?	
What evidence is given in the brief?	
What additional evidence may be needed?	
What output format is required?	
What centre instructions must be followed?	
What must not be done?	

Command word decoding

Command word in brief	My meaning in simple English	My writing action
Describe	Say what it is like	Identify features clearly
Explain	Say why or how	Give reasons and consequences
Analyse	Break it down and show relationships	Explain cause, effect and business impact
Compare	Show similarities and differences	Use same criteria for both options
Evaluate	Judge suitability and limitations	Make a reasoned judgement
Recommend	Choose a course of action	Justify with evidence and conditions

使用方法

拿到 brief 後，先填這張表。不要只看 topic。很多學生寫偏，是因為只看到「marketing」或「finance」，沒有看清楚 command word、task object 和 output format。

Appendix C. Evidence And Support Log

This log helps learners keep evidence, support and authorship visible.

Evidence log

Date	Evidence/source	Type of evidence	How I used it	Source note
		Brief / textbook / website / survey / observation / calculation		
		Brief / textbook / website / survey / observation / calculation		
		Brief / textbook / website / survey / observation / calculation		

Support log

Date	Support used	Purpose	What changed in my own work
	Teacher feedback		
	Tutor support		
	AI tool		
	Class discussion		

Integrity reminder

Support should help the learner understand, plan, check or revise. It should not replace learner authorship. If a learner cannot explain a paragraph, the paragraph needs to be rewritten in the learner's own controlled language.

學習支架

Evidence log 和 support log 的作用，是讓學生能說清「我用了什麼資料」「誰幫助過我」「我自己做了什麼修改」。這對 assignment-based learning 很重要，也能降低 AI 使用和補習支持帶來的風險。

Appendix D. Final Submission Checklist

Before submission, tick each item honestly.

Task and content

- I answered the exact command word.
- I addressed the correct task object.
- I used the business, scenario or organisation required by the brief.
- I did not write a general essay unrelated to the case.

Evidence and application

- Each main point has evidence or a clear reason.
- I separated real evidence from assumptions.
- I did not invent statistics, survey results or references.
- I applied the point to the business context.

Writing quality

- Each paragraph has one main point.
- My evidence is explained, not just inserted.
- My recommendations are justified.
- My evaluation includes conditions or limitations.
- My language is clear and cautious.

Academic integrity

- The work is my own.
- Any AI, tutor or peer support did not replace my authorship.
- I can explain my main points verbally.
- I have kept source and support notes.
- I followed centre instructions.

File control

- I am submitting the correct final version.
- The file name follows centre instructions.
- Tables, screenshots and appendices are readable.
- I have kept a copy of the submitted file.

學習支架

如果某一項不能勾選，不要假裝完成。回到相關章節修正：漏題回 Chapter 2，證據弱回 Chapter 4，段落混亂回 Chapter 5，AI 和 authorship 風險回 Chapter 6。

Appendix E. Bilingual Glossary

Term	Simple English meaning	中文理解	Writing note
Assignment brief	The official task instructions from the centre	作業任務說明	Always follow the centre-issued brief.
Command word	The verb showing what kind of writing is required	指令詞	Explain, analyse and evaluate require different depth.
Task object	The thing the learner must write about	任務對象	Do not miss whether the task asks for method, business, customer group or decision.
Evidence	Information used to support a point	證據	Must be relevant, honest and traceable.
Application	Linking a concept to the business case	應用到案例	Avoid generic business writing.
Analysis	Explaining relationships, causes and effects	分析	Show why the point matters.
Evaluation	Judging suitability, limits and conditions	評估 / 評價	Not just one advantage and one disadvantage.
Recommendation	A justified suggested action	建議方案	Must be supported by business reasons.
Cautious language	Language that avoids overclaiming	謹慎表述	Use may, could, depends on, provided that.
Academic integrity	Honest and responsible production of work	學術誠信	Protect authorship and evidence.
Authorship	The learner's ownership of the work	作者責任 / 自主完成	The learner should be able to explain the work.
Source log	Record of evidence used	來源紀錄	Helps show where information came from.
Support log	Record of help received	支持紀錄	Useful when AI, tutor or teacher feedback is used.
Model answer	A complete answer for copying	範文答案	This toolkit does not provide submission-ready model answers.
Fabricated evidence	Invented data or source	編造證據	Serious academic-integrity risk.
Centre guidance	Instructions from the school or approved centre	中心 / 學校指導	Overrides generic study advice.
